II. GENERAL INFORMATION TO THE CONSOLIDATED FINANCIAL STATEMENTS

The general information and explanatory notes form an integral part of the financial statements of the VeloBank S.A. Group as at December 31, 2025 and for the period of 12 months ended December 31, 2025.

The comparative information was prepared as at December 31, 2024 and for the period from January 1, 2024 to December 31, 2024.

1. Information about the Bank

VeloBank S.A. (the “Bank”, “parent company”, “Company”, “VeloBank”) with its registered office at Rondo Ignacego Daszyńskiego 2C in Warsaw, registered under a decision of the District Court for the City of Warsaw in Warsaw, 13th Commercial Division of the National Court Register, on September 9, 2022, under KRS no. 0000991173, is the parent company in the Group. The parent was assigned statistical number (REGON) 523075467. The Articles of Association drawn up in the form of a notarial deed of September 5, 2022 (as amended) provide the legal basis for the Bank’s operations.

The Bank’s duration is indefinite.

2. Shareholding structure

As at December 31, 2025, the Bank’s share capital totaled PLN 711,734,000.00 and was divided into 100,000 ordinary registered A series shares with a nominal value of PLN 250.00 each as well as 2,746,936 ordinary registered B series shares with a nominal value of PLN 250,00 each. All the shares were taken up by Promontoria Holding 418 B.V. and fully covered by a cash contribution.

Promontoria Holding 418 B.V., a private limited company with its registered office in Baarn, the Kingdom of the Netherlands, holds 100% of the Bank’s shares. Promontoria Holding 418 B.V. is controlled by funds managed by Cerberus Capital Management, L.P., based in New York, in the United States of America.

The parent company’s share ownership structure as at the date of these consolidated financial statements is as follows:

	share [%]	votes [%]
Promontoria Holding 418 B.V.	100%	100%
Total	100%	100%

3. Composition of the Bank’s Management Board and Supervisory Board

As at the date of the signing of these consolidated financial statements, the composition of the management and supervisory bodies of the parent company was as follows:

Management Board of VeloBank S.A.	
President of the Management Board	Adam Marciniak
Members of the Management Board	Adrian Adamowicz
	Przemysław Koch
	Tomasz Kubiak
	Paweł Pach
	Paulina Strugała

Supervisory Board of VeloBank S.A.

Chairperson of the Supervisory Board	Jakub Papierski
Vice Chairperson of the Supervisory Board	Roberto Nicastro
Members of the Supervisory Board	Paweł Borys
	Sarah Clark
	Lidia Jabłowska-Luba
	William Newton
	António Horta-Osório

Changes in the composition of the Supervisory Board between January 1, 2025 and the date of the signing of these financial statements

Mr. Roeland Brokking resigned from the position of Member of the Bank's Supervisory Board with effect as of January 29, 2025.

On January 29, 2025, the General Shareholders' Meeting appointed Mr. Paweł Borys to the Bank's Supervisory Board for a joint 3-year term of office.

Effective from November 1, 2025, the General Shareholders' Meeting appointed Mr. António Horta-Osório to the Bank's Supervisory Board for a joint 3-year term of office.

4. Information about the Group

The VeloBank S.A. Group (the "Group") is composed of VeloBank S.A. as the parent company and its wholly-owned subsidiaries.

31-Dec-2025	Percentage of shares/ voting rights held by the Bank
Berticoneby Investments Sp. z o.o.	100%
ProEkspert sp. z o.o.	100%
VeloLeasing S.A.	100%

Increase in the share capital of VeloLeasing S.A.

On December 9, 2025, the equity of VeloLeasing S.A. was increased by PLN 5 million through the issuance of 20,000 ordinary J series shares with a nominal value of PLN 1. The share issue was fully subscribed by VeloBank and fully paid in cash.

5. Accounting policies

5.1. Basis of preparation of the consolidated financial statements

These consolidated financial statements of the VeloBank S.A. Group cover the period of 12 months ended December 31, 2025. The consolidated financial statements were prepared on the historical cost basis of accounting, except for derivative contracts, financial assets which do not meet the SPPI test and financial assets designated as measured at fair value through profit or loss, debt and equity securities measured at fair value through other comprehensive income as well as loans and advances to clients measured at amortized cost. Non-current assets classified as held for sale and foreclosure assets are recognized at the lower of the carrying amount and the fair value less costs to sell.

The consolidated financial statements were prepared on the assumption that the Group will continue as a going concern in the foreseeable future, i.e. for a period of at least 12 months of the end of the reporting period. As at the date of authorization of the financial statements, there are no circumstances indicating a threat to the Group's ability to continue as a going concern.

Comparability of financial information

The comparative information as at December 31, 2024, as presented in these consolidated financial statements, were restated to reflect the presentation changes made in the current reporting period.

Change in presentation in the consolidated statement of financial position

In the statement of financial position, a change in presentation was introduced with respect to the settlement of a temporary difference and the related payment of corporate income tax. This change did not affect the statement of financial position as at January 1, 2024.

The presentation change concerns the settlement of a temporary difference and the related payment of corporate income tax.

Statement of financial position line item as at 31-Dec-2024	Value as at 31-Dec-2024 before restatement	Presentation adjustment	Restated
	PLN '000	PLN '000	PLN '000
Current tax asset	27,876	(19,188)	8,688
Deferred tax liability	132,087	(19,188)	112,899

Change in presentation in the note to the consolidated statement of financial position

In order to enhance the clarity of information from the perspective of stakeholders, in Note III.9 Income tax certain material categories of deferred tax were separated into standalone deferred tax asset/deferred tax liability line items, and selected categories were reclassified. This change did not affect the net result for 2024 nor the consolidated statement of financial position as at January 1, 2024.

Item in Note III.9 as at December 31, 2024	Data before restatement PLN '000	Presentation adjustment between deferred tax asset and deferred tax liability PLN '000	Presentation adjustment – settlement of a temporary difference* PLN '000	Restated data PLN '000
Interest receivable on financial instruments and derivatives	200,674	(60,007)	-	140,667

* Presentation adjustment corresponding to the current income tax receivable described above.

Changes in the presentation in the consolidated statement of cash flows

In the consolidated statement of cash flows, presentation changes were introduced with respect to:

- the presentation of interest,
- the use of gross result instead of net result,
- the presentation of cash flows related to other financial instruments measured at fair value through other comprehensive income and bonds measured at amortised cost.

The changes result from an alignment with observed market practice in this area and, in the Group's assessment, better reflect the nature of these items in the statement of cash flows. The changes required the restatement of comparative data; however, they had no impact on the line item "Net cash flows – total" nor on the Group's net result.

Details of the changes introduced are presented below:

- The presentation of interest result was changed. Previously, accrued interest from operating activities adjusted, among others, changes in the balance of financial assets and liabilities held for trading, changes in the balance of hedging derivatives, changes in amounts due from banks and financial institutions, changes in loans and advances to clients, changes in amounts due to banks and financial institutions, and changes in amounts due to clients. Currently, accrued interest is presented in a separate line item "Interest result", with accrued interest excluded from operating activities.
- The adjustment related to the financial result was modified – the net result previously presented was replaced with the presentation of the gross result. This also applies to the gross presentation of changes in other comprehensive income, which were previously presented on a net basis.

C. Cash flows related to other financial instruments measured at fair value through other comprehensive income and to bonds measured at amortised cost, previously presented within operating activities, were reclassified to investing activities (separately for inflows and outflows).

Line items in the consolidated statement of cash flows:

5.2. Statement of compliance

The consolidated financial statements were prepared in accordance with the International Financial Reporting Standards, the International Accounting Standards and related interpretations, as endorsed by the EU and, to the extent not regulated by the above-referenced standards and interpretations, in conformity with the provisions of the Accounting Act and secondary legislation issued thereunder.

5.3. Consolidation principles

The consolidated financial statements cover the financial statements of VeloBank S.A. as the parent company and the financial statements of its subsidiaries. The financial statements of the Bank and of its subsidiaries used in the preparation of the consolidated financial statements were prepared as at the same reporting date.

The parent company prepares the consolidated financial statements using uniform accounting policies for like transactions and other events occurring in similar circumstances. If a member of the group uses accounting policies other than those adopted in the consolidated financial statements, appropriate adjustments are made to that group member's financial statements in preparing the consolidated financial statements to ensure conformity with the group's accounting policies.

5.4. Entity authorized to audit the financial statements

Deloitte Assurance Polska Spółka z ograniczoną odpowiedzialnością Sp. k. with its registered office in Warsaw is the entity authorized to audit the consolidated financial statements of the Group.

5.5. Functional and reporting currency

The reporting currency of these consolidated financial statements is the Polish złoty (PLN), and – unless stated otherwise – all figures are presented in thousands of Polish złotys (PLN '000). The Polish złoty is the functional currency of the parent company and of the subsidiaries covered by these consolidated financial statements as well as the reporting currency of these consolidated financial statements.

5.6. Amendments to standards and interpretations

Amendments to existing standards that were endorsed and published by the European Union and entered into force on or after January 1, 2025:

IAS/IFRS		Effective date	Impact on the consolidated financial statements at initial application
Amendments to IAS 21	The Effects of Changes in Foreign Exchange Rates	January 1, 2025	The application of the amended standard did not have a material impact on the consolidated financial statements.

Standards and interpretations published and endorsed by the EU, but not yet effective:

IAS/IFRS		Effective date	Impact on the consolidated financial statements at initial application
IFRS 18	Presentation and Disclosure in Financial Statements – replacing IAS 1	January 1, 2027	The application of the standard will not affect the presented figures. Analyses are still underway as regards presentation changes.
Amendments to IFRS 9 and IFRS 7	Amendments to the Classification and Measurement of Financial Instruments	January 1, 2026	The application of the amended standards will not have a material impact on the consolidated financial statements.
Annual Improvements to IFRS Accounting Standards	The amendments concern IFRS 1, IFRS 7 (including implementation guidance), IFRS 9, IFRS 10, IAS 7 and are aimed to improve accessibility, clarity and consistency	January 1, 2026	The application of the amended standards will not have a material impact on the consolidated financial statements.

Standards and Interpretations issued by the International Accounting Standards Board (IASB), but not yet endorsed by the EU:

	IAS/IFRS	Effective date	Impact on the financial statements at initial application
IFRS 19	Subsidiaries without Public Accountability: Disclosures	January 1, 2027	The standard will not apply to the preparation of the consolidated financial statements.
Amendments to IAS 21	Translation to a Hyperinflationary Presentation Currency	January 1, 2027	The standard will not apply to the preparation of the consolidated financial statements.

The effective dates are stated in the relevant standards issued by the International Accounting Standards Board. The application dates in the EU may differ from the effective dates stated in those standards, and are announced upon the endorsement of the relevant standards by the EU.

5.7. Foreign currency translation

Transactions in currencies other than the Polish złoty are translated into PLN at the exchange rate effective at the transaction date.

At the end of the reporting period, monetary assets and liabilities in currencies other than the Polish złoty are translated at the average exchange rate determined by the National Bank of Poland for the relevant currency, effective at the end of the reporting period. Exchange differences from translation are recognized in the relevant items of the income statement. Non-monetary assets and liabilities measured at historical cost expressed in a foreign currency are recognized at the historical exchange rate effective at the transaction date. Non-monetary assets and liabilities recognized at fair value expressed in a foreign currency are translated at the exchange rate effective at the fair value measurement date.

5.8. Financial assets and liabilities

Initial recognition

The acquisition and sale of financial assets in a regular way purchase or sale of financial assets (within the meaning of IFRS 9) are recognized as at the transaction settlement date, i.e. the date when a financial asset is delivered to or by the Group.

At initial recognition, a financial asset or a financial liability is measured at fair value increased or reduced – in the case of a financial asset or a financial liability not classified as measured at fair value through profit or loss – by transaction costs that can be attributed directly to the acquisition or issue of the financial asset or financial liability.

Classification and measurement (financial assets)

The classification of financial assets is determined at initial recognition of an asset on the balance sheet and depends on:

- the business model for managing financial assets, which is determined at a level that reflects how groups of financial assets are managed together to achieve a particular business objective;
- the characteristics of contractual cash flows, i.e. whether the contractual cash flows are solely payments of principal and interest on the principal amount outstanding (the “SPPI” criterion).

Depending on the business model as well as the characteristics of the contractual cash flows, financial assets may be classified as:

- measured at amortized cost;
- measured at fair value through other comprehensive income;
- measured at fair value through profit or loss.

The business model does not depend on management's intentions for an individual instrument. The Group may have more than one business model for managing its financial instruments. The Group evaluates its business model considering all the information that is available at the evaluation date. Such information includes, but is not limited to:

- adopted policies and objectives of portfolio management and their implementation in practice;
- how the performance of the business model and the financial assets held within that business model are evaluated and reported to the Bank's key management personnel;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed;
- how managers of the financial assets are compensated;
- the frequency, value of portfolio assets sold in earlier periods, reasons for those sales and expectations about future sales.

Debt financial assets can be purchased within the following business models:

- a business model whose objective is to hold assets in order to collect contractual cash flows ("hold to collect" model);
- a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets ("hold to collect and sell" model);
- a business model whose objective is achieved by selling financial assets ("sell" model).

Financial assets that are held within a business model whose objective is to hold assets in order to collect contractual cash flows are managed to realize cash flows by collecting contractual payments over the life of the instrument. However, the Group need not hold all instruments within this business model to maturity. This model assumes that the sales of financial assets (in particular, the loan portfolio and the securities portfolio) out of a portfolio:

- are made infrequently (even if those sales are significant in value);
- are insignificant in value (either individually or in aggregate), even if a frequent number of such sales are made.

Notwithstanding the above principles, sales under this business model are possible in the following circumstances:

1. an increase in credit risk associated with specific financial assets (including the sales of an impaired NPL portfolio);
2. implementation of the liquidity contingency plan;
3. disposal of securities due to their upcoming maturity, i.e. within two weeks before their actual maturity;
4. concentration risk management;
5. forced by third parties – this applies to financial assets which, e.g. due to the requirements of supervisory authorities, have to be sold, but were originally held to collect contractual cash flows (e.g. implementation of the recovery plan);
6. amendments to laws and/or regulations – sales made to maintain the assumed level of regulatory capital;
7. implementation of the capital contingency plan or the capital conservation plan.

In the business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Group's key management personnel have made a decision that both collecting contractual cash flows and selling financial assets are integral to achieving the objective of the business model. Compared to the "hold to collect" model, this business model will typically involve greater frequency and value of sales. This is because

selling financial assets is integral to achieving the business model's objective instead of being only incidental to it. However, there is no threshold for the frequency or value of sales that must occur in this business model. The Group holds financial instruments within this business model, among others, to manage its day-to-day liquidity needs, to maintain a particular interest income profile or to match the life of the financial assets to the maturity of the liabilities financed with the use of those assets.

If a financial asset is not held within the "hold to collect" business model or within the "hold to collect and sell" business model, the Group classifies it to the "sell" business model, whose objective is to realize cash flows by selling the assets. The Group makes decisions based on the assets' fair values and manages the assets to realize those fair values. In this case, the Group's objective will result in active buying and selling financial assets.

If a financial asset is held within the "hold to collect" or "hold to collect and sell" model, the Group determines, by conducting a qualitative SPPI test, whether the financial asset's contractual cash flows are solely payments of principal and interest on the principal amount outstanding, and thus whether they are consistent with a basic lending arrangement. In a basic lending arrangement, interest comprises:

- consideration for the time value of money;
- consideration for credit risk;
- consideration for other basic lending risks (for example, liquidity risk);
- consideration for costs (for example, administrative costs) associated with holding the financial asset for a particular period of time;
- a profit margin.

If, based on the qualitative SPPI test, it is impossible to determine whether the contractual cash flows from the financial asset are solely payments of principal and interest on the principal amount outstanding, the Group performs a quantitative SPPI test (benchmark test). It involves the assessment of how different the contractual (undiscounted) cash flows from the assessed financial asset could be from the benchmark (undiscounted) cash flows.

Financial assets measured at amortized cost

Financial assets are measured at amortized cost if both of the following conditions are met and the Group did not designate them as measured at fair value through profit or loss:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows;
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if both of the following conditions are met and the Group did not designate them as measured at fair value through profit or loss:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets;
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Group may make an irrevocable election at initial recognition for particular investments in equity instruments that would otherwise be measured at fair value through profit or loss to present subsequent changes in fair value through other comprehensive income.

Financial assets measured at fair value through profit or loss

A financial asset is measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income.

Financial assets are also measured at fair value through profit or loss if they are held within the “sell” business model.

Purchased or originated financial assets that are credit-impaired on initial recognition (POCI)

POCI comprise financial instruments classified as financial assets measured at amortized cost or financial assets measured at fair value through other comprehensive income. In order for a financial asset to qualify as POCI, two conditions must be met, i.e.: a new financial asset has emerged (e.g. as a result of a substantial modification or purchase) and the new asset is impaired. POCI are measured using the effective interest method with the effective interest rate adjusted for credit risk. The Group allows the effective interest rate to be applied if the value of the financial instruments identified as POCI is immaterial.

Classification and measurement (financial liabilities)

A financial liability is any liability that is:

- a) a contractual obligation:
 - to deliver cash or another financial asset to another entity;
 - to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the entity;
- b) a contract that will or may be settled in the entity's own equity instruments and is:
 - a non-derivative for which the entity is or may be obliged to deliver a variable number of the entity's own equity instruments;
 - a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose, the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

After initial recognition, the Group measures all financial liabilities at amortized cost using the effective interest method, except for:

- a) financial liabilities measured at fair value through profit or loss;
- b) financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies;
- c) financial guarantees issued – after initial recognition, the issuer of such a contract subsequently measures it at the higher of:
 - the amount of the loss allowance;
 - the amount initially recognized less, when appropriate, the cumulative amount of income recognized in accordance with the principles of IFRS 15;

Modification of financial assets

Modification of a financial instrument is a change in cash flows of a financial asset that does not lead to the derecognition of the existing asset (non-substantial modification) as a result of renegotiations (including settlements signed with clients as a result of forbearance), resulting in an annex to the loan agreement with the client. A change in contractual cash flows resulting from the implementation of the contract terms is not a non-substantial modification. In the case of a non-substantial modification, the Group remeasures the gross carrying amount of a financial asset to the present value of the renegotiated or modified contractual cash flows,

discounted using the asset's original or most recent effective interest rate or the effective interest rate adjusted for credit losses in the case of assets classified as POCI. Any modification gain or loss identified as a result of remeasurement of the gross carrying amount is recognized in the net interest income. The adjustment to the gross carrying amount of a financial asset due to modification is recognized in the net interest income using the effective interest method. Any costs or fees related to the modification (e.g. a fee charged for signing an annex) adjust the carrying amount of the modified financial asset and are amortized over the remaining life of the modified financial asset.

A substantial modification is a change in cash flows of a financial asset which leads to the derecognition of an existing financial asset as a result of renegotiations (including settlements signed with clients as a result of forbearance), resulting in an annex to the loan agreement with the client. Any gain or loss on a substantial modification is recognized within "*Gain (loss) on derecognition of financial assets not measured at fair value through profit or loss*". The modified financial instrument is treated as a new asset, initially recognized on the balance sheet at fair value. If there are indications that the carrying amount of an asset upon a substantial modification does not reflect its fair value, it is necessary to adjust the exposure to its fair value.

The Group applies quantitative and qualitative criteria for the identification of a substantial modification. The qualitative criteria for the identification of a substantial modification include:

- currency conversion (with the exception of that resulting from the applicable laws and the loan agreement);
- change of the borrower (main borrower, except in the case of the obligor's death);
- change of the product – the legal form/type of a financial instrument (e.g. a loan to a bond);
- introduction of a contractual feature that breaches the criteria the SPPI Test or removal of such a feature.

The identification of at least one of the above-mentioned qualitative criteria leads to the recognition of a substantial modification of the financial asset. If no qualitative indications are identified, verification of the quantitative criterion is required.

The quantitative criteria for the identification of a substantial modification include:

- an increase in the exposure amount by at least 10%;
- a significant extension of the financing period – as a significant extension of the financing period, the Bank considers an extension that meets all of the following conditions:
 - a) an extension of the current financing period by more than 36 months as compared to the period set out in the agreement (and subsequent amendments thereto);
 - b) an extension of the current financing period more than twice as compared to the period set out in the agreement (and subsequent amendments thereto).

Derecognition of financial assets and financial liabilities

A financial asset is derecognised when the Group loses control over the contractual rights that comprise the given financial instrument; this usually occurs upon the sale of the instrument or when all cash flows, benefits and risks attributable to the instrument are transferred to an independent third party.

In particular, the Group writes off loan receivables from the statement of financial position against impairment allowances when such receivables are deemed uncollectible (i.e. when there are no reasonable prospects of recovering, in whole or in part, the cash flows arising from the loan agreement), that is when:

- the loan receivable has become fully due and payable, and,
- all legal and factual avenues of recovery (including judicial proceedings) have been exhausted.

The Group writes off (in whole or in part) the gross carrying amount of financial instruments measured at amortised cost if there are no reasonable prospects of recovering the financial asset, in whole or in part. A write-off constitutes

an event leading to derecognition. The Group performs periodic assessments of the recoverability of financial assets, in particular penalty interest and statutory interest.

The Group monitors the past-due portfolio with respect to the likelihood of uncollectibility. A decision to write off credit exposures (and related receivables, i.e. interest, fees and costs) from the Bank's books as uncollectible may be taken by the Bank with respect to receivables whose uncollectibility has been documented in accordance with the provisions of the Corporate Income Tax Act of 15 February 1992 (consolidated text: Journal of Laws of 2023, item 2805, as amended). The process of writing off receivables from the Bank's statement of financial position is carried out on an ongoing basis.

After derecognition of receivables from the statement of financial position, the Bank continues to monitor the exposures at least on an annual basis in order to identify potential changes in the client's situation and recovery prospects. Written-off receivables may be subject to a sale process provided that they meet the qualification criteria set out in separate internal procedures of the Bank.

The Group derecognises a financial liability (or a part thereof) if, and only if, the obligation is extinguished — that is, when the obligation specified in the contract has been discharged, cancelled, expired, or when a substantial modification of the contractual terms has occurred.

5.9. Impairment of financial assets

With respect to financial assets measured at amortized cost or at fair value through other comprehensive income and off-balance sheet liabilities (financial guarantees and lending commitments), the Group recognizes a loss allowance in accordance with IFRS 9.

IFRS 9 uses a model based on the concept of the "expected credit loss" (ECL). This means that the Group calculates losses based on ECL, focusing on a forward-looking approach, i.e. one oriented on estimating future losses based on forecasts and expected future economic conditions in the context of credit risk assessment of exposures.

In accordance with IFRS 9, the Group estimates the expected credit loss by classifying its exposures to the following stages:

1. Stage 1: 12-month expected credit loss – expected loss related to forecast expected impairment occurring within 12 months of the balance sheet date, for exposures for which neither a significant increase in credit risk nor impairment was identified from the date of initial recognition to the balance sheet date;
2. Stage 2: lifetime expected credit loss – expected loss related to impairment occurring over the expected life of a financial asset, for exposures for which a significant increase in credit risk, but no impairment, was identified from the date of initial recognition to the balance sheet date;
3. Stage 3: lifetime expected credit loss – expected loss over the expected life of a financial asset, for exposures for which impairment was identified to the balance sheet date.

At each reporting date, the Group determines for each exposure being measured whether the credit risk related to the exposure has significantly increased since initial recognition as well as whether any evidence of impairment has been identified.

The Group has adopted a definition of "default" in accordance with the EBA recommendations and the provisions of IFRS 9.

The Group applies the indication of failure to pay or delay in payment by more than 90 DPD (days-past-due) resulting in the classification to Stage 3, with the use of a definition of past due in accordance with the EBA recommendations and the Regulation of the Minister of Finance, Investment and Development dated October 3, 2019 on the level of materiality of past due credit obligations.

Other indications that a given exposure should be classified by the Group to Stage 3 include, but are not limited to:

- significant financial difficulty of an obligor manifested in the classification to the worst class (for corporate clients);
- the loan has become due and payable in its entirety as a result of termination of the agreement (the exposure was handed over to debt collection);
- credit fraud;
- the loan is contested by the obligor in court;
- death of the client;
- the obligor's failure to repay debt owed to other institutions;
- loan forbearance classified as non-performing – including: forbearance resulting in a loss of cash flows from the agreement, forbearance granted during the period of previous forbearance becoming probable or granted for exposures with significant DPD;
- obtaining information that a bankruptcy petition has been filed for the obligor or an application for the institution of recovery proceedings;
- obtaining information that enforcement proceedings are pending against the obligor the value of which proceedings, in the Group's opinion, may result in a loss of the obligor's creditworthiness;
- problems of a retail counterparty resulting from job loss or income reduction;
- specific indications of default for individually significant exposures;
- impairment spreading to other exposures of the client in the case of corporate clients and taking into account a materiality threshold of 20% for retail clients.

The Group applies quarantine periods in order to make it probable that the indications for classifying the exposure as default will cease to exist. During the first 3 months of the quarantine, the exposure continues to be classified as default and for the next 3 months of the quarantine, if the timely repayment indication exists, the exposure is classified to Stage 2.

For the purpose of estimating whether the credit risk of an exposure has increased significantly since initial recognition, the Group has defined a list of indications for Stage 2 classification, including, but not limited to:

- failure to pay or delay in payments by more than 30 DPD (in accordance with the DPD calculation algorithm in place at the Group);
- inclusion of a corporate client in the watch list as part of the Early Warning System;
- a significant deterioration of the DTI (Debt to Income) ratio;
- the client's use of BGK support (for housing loans);
- forbearance which does not result in the classification of the exposure to Stage 3;
- SICR – a significant increase in the probability of default over the life of the exposure – estimated depending on the type of exposure by comparing the PD curves during the life of the exposure according to the current exposure status and at the time of initial recognition or by comparing the qualitative assessments of the exposure (for corporate clients for whom the PD curves are not used).

The Group has defined Low Credit Risk (LCR) portfolios with exposures to local government entities/State Treasury entities and banks. For the purpose of classifying exposures to the appropriate Stage, in the case of the LCR portfolios the Group applies all of the above-described classification criteria, except for the SICR one.

The Group performs an individual measurement of individually significant exposures classified to Stage 3 and of selected exposure groups irrespective of stage classification and exposure values – hereinafter referred to as exposures obligatorily measured on an individual basis (e.g. NOSTRO exposures or other transactions concluded on the interbank market or developer exposures – to finance RE, purchase land etc.). For individually

significant exposures and for exposures obligatorily measured on an individual basis, the Group reviews indications of impairment at least once a quarter, and then estimates the level of impairment losses for individually significant exposures classified to Stage 3 and for exposures obligatorily measured on an individual basis as the difference between the carrying amount of the loan and the present value of estimated future cash flows discounted using the effective interest rate of the loan. The Group applies a scenario-based approach for the purpose of estimating the level of cash flows, and for collateralized loans, the present value of estimated future cash flows includes cash flows that can be generated through realization of the collateral in enforcement proceedings, less potential costs of enforcement and sale of the collateral, if the enforcement is probable. Other exposures which are not measured on an individual basis are included in portfolios with similar credit risk level characteristics depending on, among others, the type of the product and client or the method of measurement upon activation, and measured on a monthly basis on a collective basis – in the first place, the exposures are classified to the appropriate Stage, and then the level of 12-month expected credit losses (Stage 1) or lifetime expected credit losses (for other Stages) is estimated.

The Group has developed portfolio parameter models used to estimate expected credit losses on a collective basis, using the adopted definition of default, the forward-looking approach and macroeconomic forecasts. The PD (Probability of Default) model involves the estimation of the PD curves depending on the horizon of the estimated loss (12-month or lifetime), taking into account the Group's expectations regarding the future macroeconomic situation and considering behavioral scoring data, mostly related to historical repayment of exposures. As far as the estimation of LGD (Loss Given Default) parameters is concerned, the Group applies an approach to estimating the cure rate and the level of recovery rates broken down into the mortgage-secured and unsecured parts, taking into account the future macroeconomic situation with respect to the level of real property prices; in addition, a forward-looking element has been introduced based on estimates of exposure characteristics affecting the observed level of recoveries and cures during the lifetime of the exposure.

For purposes of modeling the expected value of exposures upon default for revolving exposures – arising from cards and overdrafts, without defined schedules, the Bank has implemented on-balance sheet and off-balance sheet value models based on historical behavioral patterns of repayments and drawdowns until default.

At each reporting date, the Group determines for each exposure being measured whether the credit risk related to the exposure has significantly increased since initial recognition as well as whether any evidence of impairment has been identified. If the loss allowance in the preceding reporting period was measured by the Group at an amount equal to lifetime expected credit losses, but at the current reporting date the Group determines that for a given exposure there are no indications of a significant increase in credit risk since the initial recognition date and no impairment indications have been reported, the Group measures the loss allowance at an amount equal to 12-month expected credit losses as at the current reporting date, subject to the applicable grace period. For a wide range of indications that exposures should be classified both to Stage 2 and Stage 3, the Group applies a grace period, i.e. a specified number of calendar months, differing depending on the indication, since the last date of observation of the indication, provided that appropriate conditions for timely repayment have been met.

Subject to paragraphs 5.5.13–5.5.16 of IFRS 9 (POCI exposures), at each reporting date, the Group measures the loss allowance for a financial instrument at an amount equal to lifetime expected credit losses if the credit risk associated with that financial instrument has increased significantly since initial recognition.

Classification of financial assets to stages also affects the method of recognition of interest income. Specifically, interest income on financial assets classified to Stages 1 and 2 is determined by applying the effective interest rate to the gross value of the exposure, and in Stage 3 and POCI – by applying the effective interest rate to the amortized cost of the asset, taking into account impairment losses.

5.10. Offsetting a financial asset and a financial liability

A financial asset and a financial liability are offset and the net amount is presented in the statement of financial position when the Group has a legally enforceable right to set off the recognized amounts and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

5.11. Impairment of non-financial non-current assets

The carrying amounts of individual assets are periodically tested for impairment. If the Group identifies any indications of impairment, it subsequently determines whether the current carrying amount of the asset is higher than the value that could be realized from its continued use or sale, which means that the recoverable amount of the asset is estimated. If the recoverable amount is lower than the current carrying amount of the asset, an impairment loss is recognized in profit or loss.

The recoverable amount of an asset is determined as the higher of its realizable value less cost to sell and the value in use of the asset. The value in use is determined as the estimated future cash flows generated by the asset, discounted using a market rate of interest plus a risk margin specific to that asset class.

An impairment loss may be reversed if there has been a change in the estimates used to determine the recoverable amount, only up to the asset's carrying amount that, net of accumulated amortization/depreciation, would have been determined had no impairment loss been recognized. An impairment loss on goodwill is not reversed.

5.12. Prepayments, accruals and deferred income

Prepayments comprise expenses which will be recognized in profit or loss on a time proportion basis in future reporting periods. Prepayments are recognized within "*Other assets*". Accruals comprise accrued expenses arising from performances made for the Group that will be settled in subsequent periods. These balances are recognized within "*Other liabilities*".

Deferred income includes, but is not limited to, received amounts of future performances and certain types of income received in advance to be recognized in profit or loss in future reporting periods. In the statement of financial position, deferred income is presented within "*Other liabilities*".

5.13. Employee benefits

Employee benefits comprise the costs of salaries, bonuses and social security contributions. The Group recognizes the anticipated value of short-term employee benefits as an expense in the period when an employee has rendered service.

In accordance with the provisions of the Remuneration Policy, the Remuneration Regulations for the Group's Staff and the Bonus Rules, a bonus may be awarded to the Group's staff. In 2025, all of the Group's staff were covered by bonus plans under which they could be awarded bonuses. The bonus rules for individual organizational units and positions differ due to the specific nature of their business tasks, but meet a uniform standard arising from the remuneration policy. The personal scope of each bonus regulation is determined each time in the regulation itself. The bonus rules for managers are laid down in the Variable Remuneration Policy or in the Bonus Rules of the organizational function concerned.

In accordance with the Labor Code and the Remuneration Regulations for the Group's Staff, the Group's staff are entitled to retirement severance pay. Such severance pay takes the form of a lump-sum payment made to an employee upon retirement and its amount depends on the employee's length of service and individual salary level. Provisions for retirement severance pay constitute defined post-employment benefit plans in accordance with

IAS 19 and are estimated based on an actuarial valuation. The provision was measured using the projected unit credit method. A discount rate of 5.29% was used in the calculation. A provision estimated as a result of the actuarial valuation is recognized within "*Provisions*" and remeasured on an annual basis.

Employees are entitled to join the Employee Capital Plans (ECPs). New hires are enrolled in the plans but may resign from making contributions at any time. Any person who is not automatically enrolled due to their age or a person who has previously resigned can join the plans without any time limit. Contributions made to the ECPs are financed by the employing entity and the ECP participant using their own funds. The employer ensures the handling and payment of all contributions. The costs of the ECPs are recognized within "*Operating expenses – Costs of employee benefits*" and "*Other liabilities*".

6. Uncertainty of estimates

The preparation of consolidated financial statements in accordance with IFRS requires the Group to make some estimates and to adopt some assumptions which affect the amounts presented in the financial statements. The estimates and assumptions are subject to ongoing review by the Group's management and are based on past experience and other factors, including expectations as to future events, which seem justified in a given situation. Although such estimates are based on the best knowledge of the current conditions and activities of the Group, the actual results may differ from those estimates. Estimates made at the end of each reporting period reflect the conditions existing at such dates (e.g. foreign exchange rates, interest rates and market prices). Changes in accounting estimates are recognized prospectively starting from the period when an estimate was changed.

The key areas for which the Group made estimates include those indicated below. Quantitative disclosures regarding these estimates are presented in the relevant notes concerning these assets and liabilities.

Expected credit losses

At each reporting date, the Group assesses whether credit risk associated with a given financial instrument has increased significantly since initial recognition. In making such assessments, the Group uses the change in the risk of default over the expected life of the financial instrument instead of the change in the expected loss amounts. To make the assessment, the Group compares the risk of default for the financial instrument concerned at the reporting date with the risk of default for the financial instrument at the date of its initial recognition, considering reasonable and supportable information that is available without undue cost or effort and that is indicative of a significant increase in credit risk since initial recognition. A list of indications of a significant increase in credit risk since initial recognition has been provided in Section II.5.9.

Derivatives and financial assets and financial liabilities measured at fair value through profit or loss

The fair value of derivatives, financial assets and financial liabilities which are not quoted on active markets is determined using generally accepted valuation techniques. All models are approved prior to their application and calibrated to ensure that the results reflect true data and comparable market prices. Only observable inputs from the active market are used in the models as far as possible, but in certain circumstances, the Group estimates the relevant uncertainties (such as the counterparty risk, volatility and market correlations). A change in assumptions made for these factors may affect the measurement of some financial instruments. More detailed information can be found in Notes III.13 and III.14.

Net realizable value of foreclosure assets

The net realizable value of foreclosure assets is estimated by the Group. The estimate reflects market conditions

and the legal status at the valuation date. More detailed information can be found in Note III.21.

Impairment of other non-current assets

At the end of each reporting period, the Group assesses whether there is any evidence that its non-current assets are impaired. If any such evidence is identified, the Group estimates the recoverable amount. Estimating the value in use of a non-current asset involves, among others, the adoption of assumptions as to the amounts and timing of future cash flows which could be generated by the Group from the non-current asset, as well as other factors. When estimating the fair value less costs to sell, the Group relies on the available relevant market data or independent appraisals, which in principle are also based on estimates. More detailed information can be found in Note III.5.11.

Measurement of provisions for retirement severance pay

The provision for retirement severance pay was estimated by means of actuarial methods by an independent actuary; the assumptions made for this purpose are updated at the end of each financial year. More detailed information can be found in Notes III.5.13 and III.28.

Measurement of provisions for litigation

The chances of winning a case, and consequently the assessment of the need to recognize a provision for losing, in respect of all court proceedings are determined on a case-by-case basis, considering the circumstances of the case. In the case of claims filed by clients, which were served on the Group and are heard before the courts of the first and second instance, an individual assessment of the probability of the Group winning a given case was made based on the estimates of the attorney representing the Group in the case. As a rule, a provision is recognized for such cases if the Group's chance of winning is determined to be lower than 50%. More detailed information can be found in Note III.28.

Deferred tax asset

The Group recognizes a deferred tax asset based on the assumption that taxable profit will be generated in the future to realize the asset. If the Group's taxable profits were to deteriorate in the future, this assumption could prove to be unfounded. Deferred tax is determined using the tax rates in effect at the end of the reporting period, which are expected to be in effect at the time of realization of specific deferred tax assets or deferred tax liabilities. More detailed information can be found in Note III.9.

Leases – the Group as a lessee

Judgments concerning leases where the Group is a lessee, in areas such as the determination of whether the contract contains a lease, contracts for an indefinite period, exercising the option to extend or shorten the lease term or the discount rate, are presented in Note III.22 to these consolidated financial statements.

Useful lives of property, plant and equipment and intangible assets

Factors taken into account when estimating the useful life of particular types of property, plant and equipment and intangible assets include, among others:

- the average useful lives applied so far, reflecting the actual wear and tear, intensity of use, etc.;
- technological obsolescence;
- the period of control of the asset and any legal or other limitations on the useful life;
- interdependencies between the useful life of the asset and the useful lives of other assets;
- other circumstances that affect the useful life of the asset type concerned.

If the period of use of an asset is based on contractual rights, the useful life corresponds to the period determined based on such contractual rights, or, if the estimated useful life is shorter, the estimated useful life is used.

On an annual basis, the Group reviews the useful lives by reference to current estimates. More detailed information can be found in Notes III.19 and III.20.

Estimates of fees to be reimbursed in connection with early repayment of consumer loans

The Group remeasured the portfolio provision for potential client claims for partial reimbursement of fees in connection with early repayment of consumer loans (for loans prepaid before the CJEU judgment, i.e. before September 11, 2019). The provision was estimated based on the time series of the fee amounts reimbursed for loans prepaid before the CJEU judgment in individual periods after the judgment was issued.

The estimate involves uncertainty related to the possible volatility of the observed trend of requests for partial reimbursement of fees and may change in the future.

For loans prepaid after September 11, 2019, the Group recognizes a liability for fee reimbursement, respectively. In addition, the Group remeasures its loan receivables measured at amortized cost in respect of deferred intermediation costs for the expected prepayments in the Group's loan portfolio for which there is an obligation to reimburse fees in the case of early repayment by the client and for the difference between the effective settlement of fees charged for granting the loan using the effective interest rate and a hypothetical linear settlement of these fees as at the expected loan prepayment date. More detailed information can be found in Note III.28.

Impairment of goodwill

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. An impairment test is performed annually and whenever there are indications that goodwill may be impaired.

The Group assesses at each reporting date whether there are indications that the carrying amount of goodwill exceeds its recoverable amount. For this purpose, an annual impairment test of goodwill is performed, irrespective of whether there are any indications that an impairment loss has occurred. The test is conducted in accordance with IAS 36.

The recoverable amount is estimated based on the value in use of cash-generating units (CGUs) to which goodwill has been allocated.

Value in use represents the present estimated value of future cash flows that the Group expects to derive from the continued use of a CGU. Value in use includes the terminal value of the CGU, which is calculated by extrapolating cash flow projections beyond the forecast period using a specified growth rate.

Forecasts of future cash flows cover a five-year period and are based on:

- historical data reflecting the CGU's ability to generate cash flows,
- balance sheet and income statement projections of the CGU as at the date of preparation of the impairment test,
- forecast balance sheets and income statements for the forecast period,
- assumptions included in the Group's budget,
- an analysis of the reasons for differences between forecast and actual cash flows.

Future cash flows used as the basis for calculating value in use reflect the value of potential dividends and/or capital injections, assuming a specified level of generated profit and the level of regulatory capital required to maintain the assumed level of capital adequacy. The present value of future cash flows is calculated using an appropriate discount rate, taking into account the risk-free rate, risk premium, small-cap premium and specific risk premium. The present value of future cash flows is compared with the carrying amount (as at the date of the impairment test) of the aggregate of goodwill and the net assets of the CGU (equity and profit of the CGU).

Although the estimates made by the Group are based on its best knowledge, the actual results may differ from the estimates. The consistency of the actual results and the estimates made is reviewed in the reporting periods.

III. EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS OF THE VELOBANK S.A. GROUP

1. Net interest income

Accounting principles

Interest income and expense include all interest income and expense on financial instruments measured at amortized cost using the effective interest method and financial instruments measured at fair value through other comprehensive income and measured at fair value through profit or loss.

The following financial assets and financial liabilities are measured at amortized cost:

- financial assets classified as measured at amortized cost;
- financial liabilities which were not classified at initial recognition as liabilities measured at fair value through profit or loss and which are not derivatives.

The effective interest rate is the rate that discounts the expected stream of future cash payments to the current gross carrying amount until maturity or until the next market-based repricing date of the financial asset or financial liability. Its determination includes all due or receivable fees and cash flows paid or received by the Bank under the contract for the instrument, excluding potential future credit losses.

The method of accounting for coupons, fees and commissions and certain external costs related to financial instruments (using the effective interest method or on a straight-line basis) depends on the nature of the instrument.

In the case of financial instruments with fixed cash flow schedules, the effective interest method is applied.

The method of recognition of the individual types of deferred fees and commissions in profit or loss as interest or commission income, and the need to defer such fees and commissions in general, depends on the economic nature of the fee or commission.

Deferred fees and commissions include, for example, loan approval fees, loan arrangement fees, loan activation fees, intermediation costs that constitute incremental costs, etc. Commissions include also consideration for insurance when there is a direct link between a credit product and an insurance product. Payment of such fees is an integral part of the return generated by a given financial instrument. This category also includes fees and costs incurred for amending the contractual terms, which results in the modification of the originally calculated effective interest rate in a situation where such modification does not lead to the derecognition of a financial asset.

Furthermore, if it is probable that certain lending arrangements will be made, any fees relating to the Bank's commitment to make such arrangements are regarded as consideration for continuing involvement in the acquisition of a financial instrument, deferred and recognized as an adjustment to the effective return upon contract conclusion (using the effective interest method or the straight-line method, depending on the nature of the product). In the case of assets for which impairment has been identified, interest income is recognized in profit or loss based on the net exposure determined as the difference between the gross value of the exposure and the impairment loss.

Interest income from leases is recognized within interest income using the effective interest rate method.

The net interest income includes also net income on interest accrued and paid in relation to derivatives.

Financial information

Net interest income	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024
	PLN '000	PLN '000

Net interest income	1,774,676	1,550,489

2. Net fee and commission income**Accounting principles**

Fees and commissions accounted for using the effective interest method are recognized by the Group in the net interest income. Fees and commissions which are deferred using the straight-line method or recognized on a one-off basis are presented within the net fee and commission income. Fee and commission income includes income on fees and commissions arising from transaction services for the execution of effective activities. Such income includes any fees for activities where the Bank acts as an agent or provides services such as distribution of investment fund units, investment and structured products, income and expense on bank commissions and fees which are not an integral part of the effective interest rate of the loan receivables, recognized on a one-off basis.

When offering insurance products to its clients, the Group recognizes the remuneration received for insurance services based on its professional judgment as to whether the sale of the insurance is limited only to the provision of the service involving the offering of insurance products or whether the insurance sale service is linked to the sale of a financial instrument.

As a result of the assessment of a direct link between an insurance product and a financial instrument, the Group may establish:

- the existence of a direct link which results in the recognition of the remuneration for the offering of insurance products using the amortized cost method, settled using the effective interest method and recognized in interest income;
- the absence of a direct link which results in the recognition of the remuneration for the offering of insurance products in commission income in accordance with the requirements of IFRS 15 *Revenue from Contracts with Customers*;
- the existence of a compound product composed of a financial instrument and an insurance product, resulting in the division of the remuneration for the offering of the insurance product based on the separation of the fair value of the financial instrument offered and the fair value of the insurance product sold together with that instrument.

If a compound product is identified, the remuneration for the sale of the insurance product is divided into the part that constitutes the amortized cost element of the financial instrument and the part that constitutes the remuneration for the agency services performed. The remuneration is divided as the proportion of the fair value of the financial instrument and the fair value of the agency service relative to the total of both these amounts. The fair value of the agency service and the financial instrument is measured based on market data. If after-sales activities or services are performed resulting from the insurance product offered, the relevant part of the remuneration allocated to the agency service is settled over the term of the insurance contract using the stage of completion method, in line with the matching principle. Such remuneration is recognized within the commission income.

The Group estimates the part of the remuneration to be reimbursed (e.g. due to insurance contract termination by the client, prepayments or on any other basis) in the periods following the sale of the insurance product. The part of the remuneration so estimated is deferred up to the amount of the expected reimbursements. In the part relating to revenue which is accounted for at amortized cost, the expected reimbursements are included in the remuneration recognized in the amortized cost of the financial instrument. In a situation where the remuneration is divided for a compound product, the expected reimbursements relating to the part which is accounted for using the effective interest method and recognized as the remuneration for the agency service are allocated to those items in the same way as the remuneration was divided.

The Group divides the costs associated with the sale of an insurance product into directly related and other, not directly related costs, including fixed costs (recognized when incurred).

Significant commission income recognised by the Group includes:

1. Commission income from loans and advances, comprising fees for sent payment reminders and issued certificates. Due to their nature, these revenues are mostly recognised on a one-off basis in profit or loss at the time the service is rendered to the client. Other fees and commissions related to loans and advances, such as fees for a positive credit application decision, loan origination fees, loan disbursement fees, intermediary fees constituting incremental costs, etc., are recognised over time over the duration of the contract.
2. Commission income from debit and credit cards includes, among others, fees for card servicing, card transactions, cash withdrawals from ATMs and fees for the use of cash deposit machines. These revenues are mostly recognised on a one-off basis at the time the service is provided to the client.
3. Income from bank account servicing is mostly recognised on a one-off basis at the time the service is performed.
4. Insurance-related income is recognised in accordance with the principles described above.
5. Income from investment and banking products includes income arising from transactional services for the performance of a specific service. One-off recognised income includes all fees for activities where a Group

company acts as an agent or provides services such as the distribution of investment fund units and investment products.

other fee and commission expense	5,496	4,210
Total fee and commission expense	114,023	149,262
Net fee and commission income	77,664	(7,833)

* The level of commission expense relating to promotions and rewards for clients in 2024 was determined by a change in the estimates of the parameters of the model for the settlement of acquisition costs relating to savings and checking accounts, savings accounts and current accounts for businesses following their annual review.

3. Dividend income

Accounting principles

Dividend income is recognized in profit or loss when the shareholders' right to receive the payment is established.

Financial information

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000
Dividend income		
Dividends received:		
from issuers of securities classified as financial assets measured at fair value through other comprehensive income	4	4
from issuers of securities classified as financial assets measured at fair value through profit or loss	42	111
Total dividend income	46	115

4. Gain (loss) on financial instruments measured at fair value through profit or loss and net foreign exchange income

Accounting principles

Gain (loss) on financial instruments measured at fair value through profit or loss and net foreign exchange income comprises gains and losses from fair value measurement of held-for-trading financial assets and financial liabilities, financial assets and financial liabilities measured at fair value through profit or loss and derivatives, as well as gains and losses arising from the translation of foreign currency assets and liabilities at the average exchange rate published for a given currency by the National Bank of Poland as at the balance sheet date.

Financial information

Gain (loss) on financial instruments measured at fair value through profit or loss and net foreign exchange income	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024
	PLN '000	PLN '000
Gain (loss) on financial instruments measured at fair value through profit or loss, including:	1,570	5,362
on instruments which were designated at initial recognition as measured at fair value through profit or loss	1,592	4,368
on financial instruments measured at fair value through profit or loss	2,393	(2,039)
on derivatives	(2,415)	3,033
Net foreign exchange income	(2,456)	(428)
Total gain (loss) on financial instruments measured at fair value through profit or loss and net foreign exchange income	(886)	4,934

5. Gain (loss) on derecognition of financial assets

Accounting principles

Gain (loss) on other financial instruments includes in particular realized gains and losses on disposal of financial assets measured at amortized cost and debt financial instruments measured at fair value through other comprehensive income, as well as gain (loss) on substantial modification leading to the derecognition of a financial instrument.

Financial information

Total gain (loss) on derecognition of financial assets	(6,921)	(357)

6. Net other operating income and expense

Accounting principles

Other operating income and expense includes income and expense which is not directly related to the Group's banking activities. It includes, in particular: gains (losses) on disposal of fixed assets, income and expenses from provisions and impairment losses on non-financial assets, rental income and expense, revenue from sales of other services, damages, penalties and fines received and paid, as well as costs of debt collection and court fees and provisions for litigation.

Financial information

	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024
Net other operating income and expense	PLN '000	PLN '000

Consumption of materials and energy	13,858	15,098
Third-party services	303,339	259,052
Taxes and charges	18,946	8,446
Amortization and depreciation	134,852	117,458
Other expenses	6,392	5,192
Payments to the Bank Guarantee Fund	56,272	7,097
Total operating expenses	1,079,826	859,611

Headcount

As at December 31, 2025 and December 31, 2024, the Group's headcount was as follows:

	31-Dec-2025	31-Dec-2024
Number of employees	3,567	3,445
Number of FTEs	3,508.22	3,405.0

8. Net impairment losses on financial assets and provisions for off-balance sheet liabilities

Financial information

Net impairment losses on financial assets and provisions for off-balance sheet liabilities	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000
Loans and advances to clients	2,334	(147,947)
Amounts due from banks and financial institutions	(905)	(315)
Other financial instruments	710	(539)
Off-balance sheet liabilities	(9,834)	(14,418)
Total net impairment losses on financial assets and provisions for off-balance sheet liabilities	(7,695)	(163,219)

In 2025, the net impairment losses were affected by sales of NPL portfolios with a positive financial effect (effect on profit of approximately PLN 100 million). Their level was additionally supported by movements in the portfolio of high-value corporate exposures subject to collection.

01-Jan-2025 – 31-Dec-2025	Loans and advances to clients PLN '000	Amounts due from banks and financial institutions PLN '000	Other financial instruments PLN '000	Off-balance sheet liabilities PLN '000	Total PLN '000
Impairment losses/provisions at the beginning of the period	1,528,411	1,108	21,091	27,604	1,578,214
Net change in impairment losses/provisions recognized in profit or loss	(2,334)	905	(710)	9,834	7,695
Use – write-off	(98,949)	-	(7,250)	-	(106,199)
Use – sale	(254,763)	-	-	-	(254,763)
Other net increases/(decreases)	33,296	(9)	-	(14)	33,273
Impairment losses/provisions at the end of the period	1,205,661	2,004	13,131	37,424	1,258,220

The Group writes off receivables in correspondence with impairment losses (in whole or in part) when it no longer expects further cash flows for the receivables and when receivables are canceled.

The contractual cash flows required by the contracts of financial assets that were written off in 2025 and are still subject to enforcement proceedings as at December 31, 2025 amounted to PLN 171 million (as at December 31, 2024: PLN 5 million).

9. Income tax

Accounting principles

The Group presents its income tax broken down into current tax and deferred tax.

Current tax

Current tax liabilities and assets for the current period and for prior periods are measured at the amount expected to be paid to (or recovered from) taxation authorities, based on tax rates and tax regulations enacted or substantively enacted at the balance sheet date. At the same time, the effect of current tax is recognized in profit or loss.

Current corporate income tax is calculated in accordance with Polish tax regulations. The basis for calculation is the pre-tax accounting profit adjusted for non-deductible expenses, non-taxable income as well as other income and expenses changing the tax base, as defined in the Corporate Income Tax Act dated February 15, 1992 (the "CIT"). The most significant permanent differences in terms of value concern the contribution to the Bank Guarantee Fund and tax on certain assets of financial institutions.

At present, the Group carries out its tax settlements holding the view that there was no tax succession at the time of the resolution in accordance with Article 93 § 4 of the Tax Code.

The aforementioned provision on universal tax succession applies in the case of a business combination where a bank acquires another bank. This understanding is supported by the explanatory memorandum to the act introducing this provision, which indicates that it relates to the acquisition of a bank by another bank carried out under the provisions of the banking law, as a result of which the bank being acquired ceases to exist.

Considering the foregoing conclusions regarding the existence of tax succession in connection with the application of the resolution instrument, the Bank treats the transferred receivables as acquired receivables for the purposes of CIT. This means, among other things, that:

- neither loss allowances, nor receivables written off as bad debts may constitute a tax-deductible expense for CIT purposes for the Bank;
- the taxable profit relating to such receivables should be determined in accordance with Article 15ba of the CIT Act;
- a loss on the sale of the receivables may not be regarded as a tax-deductible expense under Article 16.1(39a) of the CIT Act.

In the absence of the tax succession, as stipulated in Article 93 of the Tax Code, the assets and liabilities transferred

as of October 3, 2022 to the bridge institution as a result of the Bank Guarantee Fund's decision to initiate resolution against Getin Noble Bank S.A. were measured at market value. The effect of the measurement was reflected in deferred tax.

Deferred tax

For purposes of financial reporting, deferred tax is calculated using the balance-sheet liability method in relation to all temporary differences existing at the end of the reporting period between the tax values of the assets and liabilities and their carrying amounts presented in the financial statements.

A deferred tax liability is recognized for all taxable temporary differences, except where the deferred tax liability arises from the initial recognition of goodwill or the initial recognition of an asset or a liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit or loss nor the taxable profit or loss, and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences and in the case of taxable temporary differences arising from investments in subsidiaries, unless the investor is able to control the timing of the reversal of the temporary differences or when it is probable that the temporary differences will not reverse in the foreseeable future.

A deferred tax asset is recognized for all deductible temporary differences and unused tax losses carried forward to subsequent years, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, assets and losses can be utilized, except to the extent that the deferred tax assets related to deductible temporary differences arise from the initial recognition of an asset or a liability in a transaction which is not a business combination, and, at the time of the transaction, affect neither the accounting profit or loss nor the taxable profit or loss, and at the time of the transaction, do not give rise to equal taxable and deductible temporary differences.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is subject to appropriate reduction to the extent that it is no longer probable that taxable profit sufficient for a partial or full realization of the deferred tax asset will be generated. An unrecognized deferred tax asset is reassessed at the end of each reporting period and is recognized to the extent that it is probable that future taxable profit will be available against which the asset can be recovered.

Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is reversed, using tax rates and tax regulations that are in force at the balance sheet date or those whose application in the future is certain at the balance sheet date.

Deferred tax is recognized as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from a transaction or event which is recognized either in other comprehensive income or directly in equity. In such cases, deferred tax is recognized in other comprehensive income if it relates to items that are recognized in other comprehensive income, or directly in equity if it relates to items that are recognized directly in equity.

The Group offsets deferred tax assets against deferred tax liabilities if and only if it has a legally enforceable right to set off current income tax assets against current income tax liabilities and the deferred tax is attributable to the same taxable entity and the same taxation authority.

IFRIC 23 explains how to disclose and measure deferred and current tax assets and liabilities when there is uncertainty over tax treatment. In such a circumstance, an entity shall recognize and measure its current or deferred tax assets and liabilities applying the requirements of IAS 12 based on taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates. According to the interpretation, the effects of uncertainty should be measured based on the approach which best predicts how the uncertainty will be resolved: either the most likely amount method or the expected value method. The Bank takes into account the effects of uncertain tax treatment

where it would be likely that the taxation authorities would not accept the Group's approach.

* The presentation adjustment for 2024 was described in Note II.5.1.

Global top-up tax (GloBE)

On January 1, 2025, the Act on Top-Up Tax on Constituent Entities of Multinational and Domestic Groups dated November 6, 2024 entered into force, implementing the principles of the so-called global minimum tax (GloBE / Pillar 2) into the Polish legal system.

In the financial year ended December 31, 2025, the Group was not subject to the obligation to calculate or pay top-up tax within the meaning of the above Act, for the following reasons:

- Global tax (IIR / UTPR)

The Group is not a constituent entity of a multinational group subject to consolidation within the meaning of the regulations on top-up tax, and therefore it is not obliged to apply the global top-up tax mechanisms (IIR/UTPR).

- Domestic top-up tax (QDMTT)

With regard to domestic top-up tax, the Group is using a periodic exemption from the obligation to calculate the national top-up tax, provided for domestic groups under the Act on Top-Up Tax. Consequently, in the financial year ended December 31, 2025, the Group was not obliged to calculate or pay domestic top-up tax.

At the balance sheet date, the Management Board did not identify a risk of a top-up tax liability arising for the presented financial year.

10. Earnings per share

Basic earnings per share

Net earnings per share for each reporting period are calculated by dividing the net profit for the period by the weighted average number of shares outstanding in the reporting period. The disclosures required under IAS 33 are presented only on the basis of the consolidated financial information in the consolidated financial statements.

	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024
Profit for the period attributable to equity holders of the parent (in PLN '000)	524,048	380,155
Weighted average number of ordinary shares	2,846,936	2,846,936
Basic earnings per share (in PLN)	184.07	133.53

Diluted earnings per share

Diluted earnings per share are calculated by dividing the net profit for the period attributable to holders of ordinary shares of the parent by the weighted average number of ordinary shares outstanding in the period, adjusted by the weighted average number of the ordinary shares which would be issued as a result of conversion of all dilutive potential equity instruments into ordinary shares.

VeloBank S.A. did not issue any dilutive instruments in 2025. The value of diluted earnings per share is equal to the value of basic earnings per share.

11. Cash and balances with the Central Bank

Cash and balances with the Central Bank	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Cash	97,691	96,093
Current and O/N account with the Central Bank	1,760,149	1,993,411
Total cash and balances with the Central Bank	1,857,840	2,089,504

The Group may use its balances with the Central Bank during the day for current cash settlements, but it must ensure that the average monthly account balance is maintained in the appropriate amount resulting from the declared reserve requirement.

As at December 31, 2025 and December 31, 2024, cash held in the reserve requirement account bore interest at the rate of 4.00% and 5.75%, respectively.

12. Amounts due from banks and financial institutions

Amounts due from banks and financial institutions	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Current accounts	16,541	15,985
Deposits	-	301,616
Receivables from cash collateral	829,740	455,570
Other receivables	3,501	2,951
Total gross amounts due from banks and financial institutions	849,782	776,122
Impairment losses on receivables	(2,004)	(1,108)
Total net amounts due from banks and financial institutions	847,778	775,014

	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Current receivables	849,782	474,506
Term receivables maturing:	-	301,616
within 1 month	-	301,616

	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Floating-rate receivables	847,778	472,423
Fixed-rate receivables	-	302,591
Total net amounts due from banks and financial institutions	847,778	775,014

13. Financial assets measured at fair value through profit or loss

Financial assets measured at fair value through profit or loss	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Debt instruments	1,110	2,902
Equity instruments	1,642	20,738
Investment certificates	97	-
Total financial assets measured at fair value through profit or loss	2,849	23,640

The note presents shares in VISA Inc. C series shares are recognized in the financial statements as debt instruments. A series preference shares (upon conversion) are recognized as equity instruments. The valuation of A series preferred shares in VISA is performed on the basis of the quoted prices of ordinary shares in VISA Inc on the US Stock Exchange.

In 2Q2025, the Bank sold its block of preferred A series shares with the sale amounting to PLN 20.1 million.

14. Derivative financial instruments

Accounting principles

Derivative financial instruments are recognized at the date of the transaction and measured at fair value at the end of the reporting period. Changes in the fair value of derivatives which are not subject to hedge accounting are recognized by the Group within Gain (loss) on financial instruments measured at fair value through profit or loss and net foreign exchange income, in correspondence with, respectively, assets/liabilities arising from derivative financial instruments.

The effect of the final settlement of derivative transactions is recognized within Gain (loss) on financial instruments measured at fair value through profit or loss and net foreign exchange income.

The notional amounts of derivative transactions are recognized as off-balance sheet items at the date of the transaction and throughout their duration. Foreign currency off-balance sheet items are remeasured at day-end at the average exchange rate of the National Bank of Poland (fixing as at the measurement date).

The fair value of derivative financial instruments that are on a market is their market price. In other cases, it is the fair value determined based on a valuation model, inputs to which have been obtained from an active market (particularly in the case of IRS using the discounted cash flow method).

Retail loans	101,364	54,587
Total loans and advances measured at fair value through profit or loss	173,711	92,130

At fair value, the Group recognises those loan portfolios whose contractual cash flows do not represent solely payments of principal and interest on the outstanding principal amount and which, as a result, have been classified as measured at fair value through profit or loss. The loan portfolio related to credit card operations, which incorporates a leverage/multiplier element within its interest rate structure, has likewise been classified as measured at fair value through profit or loss.

17. Other instruments measured at fair value through other comprehensive income

Accounting principles*Other instruments measured at fair value through other comprehensive income*

Financial instruments are measured at fair value through other comprehensive income if both of the following conditions are met and the Group did not designate them as measured at fair value through profit or loss:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets;
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Group may make an irrevocable election at initial recognition for particular investments in equity instruments

that would otherwise be measured at fair value through profit or loss to present subsequent changes in fair value through other comprehensive income.

Treasury bonds pledged as security for repayment of debt	3,005,418	4,991,567
Total assets pledged as security for liabilities	3,028,137	5,105,641

19. Intangible assets

Accounting principles

An intangible asset is an identifiable non-monetary asset without physical substance, which is controlled by the Group and which will generate future economic benefits for the Group.

Intangible assets may be purchased in a separate transaction, generated internally or acquired in a business combination.

At initial recognition, intangible assets are measured at cost. The cost of intangible assets acquired in a business combination is equal to their fair value as at the business combination date. After initial recognition, intangible assets with a limited useful life are recognized at cost less accumulated amortization and impairment losses.

The following development expenditure is capitalized in the value of intangible assets:

- costs of services used in generating the intangible asset;
- costs of employee benefits arising directly from the generation of the intangible asset.

Expenditure incurred on internally generated intangible assets, except for development expenditure, are expensed in the period when they were incurred.

The Group determines whether intangible assets have limited or unlimited useful lives. Intangible assets with a limited useful life are amortized throughout their useful life and tested for impairment each time there is an indication of impairment. The amortization period and method for an intangible asset with a limited useful life are reviewed at least at the end of each financial year. Changes in the expected useful life or in the expected pattern of consumption of economic benefits embodied in the asset are recognized by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates.

The estimated useful lives are presented in the table below:

Type of intangible assets	Estimated useful life
Software	from 13 to 240 months
Other intangible assets	from 13 to 240 months

Intangible assets with an unlimited useful life and those that are not in use are tested for impairment annually, either individually or at the level of cash-generating units.

Any gains or losses arising on derecognition of intangible assets from the statement of financial position are measured as the difference between net proceeds from the sale of a given asset and its carrying amount, and are recognized in profit or loss when the promised asset is transferred to the counterparty.

Amortization of intangible assets is presented within “*Operating expenses*” in the income statement.

Financial information

20. Property, plant and equipment

Accounting principles

Items of property, plant and equipment are recognized at cost less accumulated depreciation and impairment losses. The gross value of a fixed asset comprises its cost plus any costs directly attributable to its purchase and bringing it to a working condition. The carrying amount of property, plant and equipment also includes expenses related to the improvement/increase in the value of a fixed asset. Any costs incurred after a fixed asset has been made available for use, such as costs of repairs and maintenance, are recognized in profit or loss when incurred.

Upon their purchase, fixed assets are divided into components of material value to which separate economic useful lives can be assigned.

Depreciation is calculated using the straight-line method over the estimated useful life of an asset. Residual values, useful lives and methods of depreciation of assets are reviewed and, if necessary, adjusted at the end of each financial year.

The table below presents the estimated useful lives of fixed assets:

Type of fixed assets	Estimated useful life
Leasehold improvements	from 13 to 120 months (or the lease term, if shorter)
Buildings	from 300 to 800 months
Technical equipment and machinery	from 13 to 180 months
Computer sets	from 13 to 120 months
Vehicles	from 13 to 96 months
Office equipment, furniture	from 13 to 120 months

An item of property, plant and equipment may be derecognized from the statement of financial position upon disposal or when no economic benefits from the continued use of the asset are anticipated. Any gains or losses arising from derecognition of an asset from the statement of financial position (calculated as the difference between net proceeds from sale, if any, and the carrying amount of the item) are recognized in profit or loss when the promised asset is transferred to the counterparty.

Fixed assets under construction include fixed assets in the course of construction or assembly, and they are measured at cost. Fixed assets under construction are not depreciated until their construction is complete and until they are made available for use.

In the period of 12 months ended December 31, 2025 and in the period of 12 months ended December 31, 2024, there were no material purchases or sales of property, plant and equipment. As at December 31, 2025, there were no material liabilities arising from purchases of property, plant and equipment.

21. Foreclosure assets

Accounting principles

Foreclosure assets comprise undeveloped and developed land as well as premises constituting separate ownership, acquired or taken over by the Bank in exchange for partial or total reduction of loan receivables.

Foreclosure assets are measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price less the costs necessary to make the sale. The net revaluation gain (loss) on foreclosure assets is presented within *Net operating income and expense*.

Financial information

Foreclosure assets	31-Dec-2025 PLN '000	31-Dec-2024 PLN '000
Real property, including:		
residential buildings and premises	21,024	18,340
other buildings and premises	4,874	6,548
agricultural plots	17,302	17,263
plots	2,819	4,267
Total foreclosure assets	46,019	46,418

sale of real property	(3,525)	(7,390)
reclassification to assets held for sale	(4,524)	(5,117)
Net gains/(losses) on adjustments to fair value measurement	5,893	(3,763)
Foreclosure assets at the end of the period	46,019	46,418

22. Leases

Accounting principles

The Group is party to lease contracts concerning space and vehicles used in its operations. The space lease terms usually range from 3 to 5 years, while vehicles are leased mainly for 5 years. The Bank's lease liabilities are secured by the lessor's ownership right in the leased assets.

The Group recognizes a right-of-use asset together with a corresponding lease liability at the amount of discounted future payments over the lease term – as an item of “*Property, plant and equipment*” and “*Other liabilities*”, respectively. In the income statement, the Group recognizes the costs of depreciation of the right-of-use asset under the lease (within “*Operating expenses*”) and interest expense on the lease liability (within “*Interest expense*”). The measurement of the lease liability is periodically offset against the lease payments. Right-of-use assets are depreciated on a straight-line basis, while liabilities under lease contracts are accounted for using the effective interest rate.

Lease liabilities arising from leases of real property denominated in foreign currencies are measured at each balance sheet date, and revaluation gains or losses are recognized in profit or loss.

The Group has applied the practical expedient envisaged by the standard for short-term leases and leases of low-value assets. For such contracts, the Group recognizes the lease payments as an expense on a straight-line basis over the lease term.

As an intermediate lessor, the Group subleases part of its leased space to other parties (sublease).

Accordingly, the Group recognized lease receivables with a corresponding entry in the lease liabilities for the portion corresponding to the concluded sublease contracts. Lease receivables are measured by the Group at the amount of future payments over the lease term, discounted using the lessee's lease rate. The measurement of lease receivables is periodically offset against lease payments from sub-lessees. Interest income on sublease receivables is presented in the income statement as "*Interest income*".

Temporary differences between the accounting and tax treatment of leases are recognized within deferred tax. On the other hand, changes in the terms of space lease agreements are recognized as permanent differences in the tax calculation.

Financial information

Leases – recognition on the balance sheet	31-Dec-2025 PLN '000	31-Dec-2024 PLN '000
Property, plant and equipment	82,906	68,805
Other liabilities	71,116	78,593

Cost of short-term leases	(301)	(92)
Cost of leases of low-value assets	(2)	(40)
Foreign exchange gain or loss	613	993
Total amount recognized in the income statement	(39,580)	(36,950)

Operating leases – the Group as a lessor

The Group earns income from lease of buildings as well as commercial and residential premises in the real properties it holds. These contracts are treated as operating leases. These contracts do not provide for any contingent payments to be made by the lessee and there are no limitations imposed by the leases. The contracts are concluded mainly for a definite period of 2–5 years, with the extension option.

The primary risk factor is the market environment and the highly competitive leasing market in Poland. The market in which the Group operates is vehicle financing in the small and medium-sized enterprise (SME) sector. This market is characterised by high volatility and a strong dependence on regulatory and economic factors. Financial activity in this sector is closely correlated with sales of new and used vehicles. From the demand perspective, the Group's business may be positively affected by further reductions in interest rates by the Monetary Policy Council. In addition, the persistence of low interest rates may have a positive impact on the Group's financial performance.

The second most significant risk factor is credit risk, defined as the possibility that a counterparty fails to meet its

obligations when due. In order to mitigate credit risk, procedures for the approval of leasing applications and leasing loan applications have been implemented. These procedures are designed to limit risk both at the client level and with respect to the collateral object. The Group continuously monitors its portfolio in order to identify early signs of potential client insolvency and to undertake collection activities, as well as to introduce, where necessary, changes to approval procedures. The Group has an approved provisioning methodology on the basis of which impairment allowances are determined.

Foreclosure assets leased under operating leases – income and costs	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000

Income from rentals/ recharged costs associated with leased and subleased space	24	27
Direct costs to be recharged to the lessee	6	6

23. Non-current assets held for sale

Accounting principles

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. The above condition may be met if and only if an asset is available for immediate sale in its present condition, and its sale is highly probable. Classification of an asset as held for sale means that the Bank's management intends to complete the sale within one year of the classification date.

Non-current assets held for sale are recognized at the lower of their carrying amount as at the classification date and fair value less costs to sell. Assets included in this category are not depreciated.

If the criteria for classification to the group of non-current assets held for sale are not met, the Bank ceases to recognize the assets as held for sale and reclassifies them to the appropriate category of assets. In this case, the asset is measured at the lower of:

- its carrying amount as at the date immediately preceding its classification as held for sale, adjusted for depreciation or revaluation which would have been recognized had the asset not been classified as held for sale;
- its recoverable amount as at the date of the decision not to sell the asset.

Financial information

Non-current assets held for sale at the end of the period	963	129

24. Other assets

Accounting principles

Other receivables are recognized at the amount due less impairment losses. Where the effect of changes in the time value of money is material, the value of receivables is determined by discounting expected future cash flows to their present value, with the use of a gross discount rate reflecting the current market assessments of the time value of money. If the discounting method is applied, an increase in receivables over time is recognized in profit or loss.

28. Provisions

Accounting principles

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event and when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the liability amount can be made.

Financial information

*Provision for litigation**Free credit sanction*

As at December 31, 2025, 824 proceedings were pending with the total amount of claims of PLN 35.99 million regarding the free credit sanction within the meaning of Article 45 of the Consumer Credit Act dated May 12, 2011, where the claimants seek reimbursement of interest and other costs incurred in connection with the conclusion of the loan agreement.

By December 31, 2025, 185 cases had been closed with final rulings, 143 of which were favorable and 29 unfavorable to the Bank. In addition, 13 proceedings were discontinued.

The Group consistently questions the legitimacy of the above-mentioned claims and engages in court disputes. For the most part, the case law to date has been favorable to the Bank.

On February 13, 2025, the Court of Justice of the European Union ("CJEU") issued a judgment in case C-472/23 regarding the application of the free credit sanction. The CJEU has left a wide margin of discretion to national courts hearing individual cases. The Bank analyzes the impact of the above ruling on the proceedings it is a party to thoroughly and adapts the legal argumentation on an ongoing basis as appropriate.

Provision for litigation	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024

Reversal	(8,183)	(2,774)
Provisions at the end of the period	29,060	20,950

Provision for expected reimbursement of a portion of fees charged on early repayment of consumer loans

On September 11, 2019, the CJEU, in response to a question referred by a Polish court for a preliminary ruling as regards interpretation of Article 16(1) of Directive 2008/48/EC of the European Parliament and of the Council of April 23, 2008 on credit agreements for consumers, issued a ruling in case C 383/18, noting that the right of the consumer to a reduction in the total cost of the credit in the event of early repayment of the credit includes all the costs imposed on the consumer. This applies to consumer loans granted as of December 18, 2011 in the amount of no more than PLN 255 thousand and mortgage loans granted as of July 22, 2017 without a limitation on the loan amount, which are repaid before the contractual maturity.

When assessing the legal risk resulting from court actions, the Group recognizes provisions for litigation in accordance with the requirements of IAS 37 "*Provisions, Contingent Liabilities and Contingent Assets*". As at December 31, 2025, the Bank was a respondent in 95 cases concerning reimbursement of a portion of fees for granting consumer loans, for which provisions were recognized in the total amount of PLN 817.6 thousand within "*Provision for litigation*".

In addition, the Group estimated the provision based on a time series of the amounts of fees reimbursed for loans prepaid before the issue of the CJEU judgment in the respective periods after the judgment was issued. As at December 31, 2025, the balance of such provisions was PLN 3,504 thousand.

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000

Provisions at the end of the period	3,504	5,158

Provision for retirement and disability severance pay

The provision for employee benefits includes retirement and disability severance pay and is recognized individually for each employee on the basis of an actuarial valuation performed by an independent actuary. The calculation basis is the expected amount of the retirement and disability severance pay that the Group is obliged to make pursuant to the remuneration regulations. The value of the provisions so determined is equal to the amount of discounted future payments, taking into account employee turnover, and relates to the period until the reporting date. Changes in liabilities due to future employee benefits are presented below:

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000

Provisions at the beginning of the period	1,873	1,383
Recognition/remeasurement	408	414
Use	(124)	(83)
Other increases/(decreases)	92	159
Provisions at the end of the period	2,249	1,873

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000
Present value of the liability at the beginning of the period	1,873	1,383
Costs recognized in profit or loss, including:	408	414
current service cost	303	345
interest expense	105	69
(Gains)/losses recognized in other comprehensive income, including:	(4)	159
Actuarial (gains)/losses arising from ex-post adjustments to assumptions	38	(53)
Actuarial (gains)/losses arising from changes in demographic assumptions	40	195
Actuarial (gains)/losses arising from changes in financial assumptions	(82)	17
Benefits paid	(124)	(83)
Acquisition of a subsidiary	96	-
Present value of the liability at the end of the period	2,249	1,873
Carrying amount of current liabilities	338	376
Carrying amount of non-current liabilities	1,911	1,497

A discount rate of 5.29% was used in the calculation. It corresponds to market rates of return on long-term Treasury bonds as at the valuation date. The effect of an increase/decrease in the discount rate on the change in the provision for retirement and disability severance pay is presented in the table below:

	31-Dec-2025		31-Dec-2024	
	+0.25 p.p.	-0.25 p.p.	+0.25 p.p.	-0.25 p.p.
Provision for retirement and disability severance pay	1,996	2,072	1,786	1,854

Provision for the risk of joint and several liability for VAT

The provision for the risk of joint and several liability for VAT to the taxation authorities relates to receivables purchased from leasing companies without the application of the split payment mechanism, transferred in October 2023 by decision of the Bank Guarantee Fund to PZA S.A.

Until the transfer of these receivables, the Bank included the risk associated with partial financing of VAT in the calculation of expected credit losses.

The significant value of the reversal of the provision in 2025 results from payments made by clients, which translated into a reduction in the value of liabilities with future payment dates.

Provision for the risk of joint and several liability for VAT	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000
Provisions at the beginning of the period	32,856	32,856
Recognition/remeasurement	3,920	-
Reversal	(15,071)	-
Provisions at the end of the period	21,705	32,856

29. Equity

Equity comprises capitals and funds created in accordance with the applicable laws, appropriate legal acts and the articles of association. It consists of the share capital, retained earnings and other components of equity.

Share capital

The share capital is presented at nominal value, in accordance with the articles of association and the entry in the court register.

Other components of equity

Supplementary capital

The share premium (excess of the issue price over the nominal value of the shares) less direct costs incurred in connection with the issue and created from appropriations of profit.

Revaluation reserve

The revaluation reserve relating to debt and equity financial instruments measured at fair value through other comprehensive income, the revaluation reserve relating to cash flow hedges, actuarial gains/losses and deferred tax on items that constitute temporary differences recognized in the revaluation reserve.

Reserve capital

The reserve capital created from appropriations of profit and other sources to cover special losses and expenses.

Retained earnings/(losses) (undistributed profit or accumulated loss)

The retained earnings include appropriations of profit for the current and prior periods which have not been allocated to other components of equity or distributed to the shareholders.

VELOBANK S.A. GROUP

Consolidated financial statements for the period of 12 months ended December 31, 2025
(figures in PLN '000)

	31-Dec-2025 PLN '000	31-Dec-2024 PLN '000
Share capital	711,734	711,734
Supplementary capital	671,415	671,415
Revaluation reserve, including:	(185,536)	99,766
measurement of financial instruments at fair value through other comprehensive income	891	(295)
measurement of cash flow hedges	(186,137)	100,370
actuarial gains/(losses)	(290)	(309)
Other components of equity, including:	763,604	381,382
retained earnings/(losses)	(8)	1,920
other reserves	763,612	379,462
Undistributed prior year profit	(2,067)	-
Net profit	524,048	380,155
Non-controlling interests	9,550	-
Total equity	2,492,748	2,244,452

As at December 31, 2025, the Group's share capital totaled PLN 711,734,000.00 and was divided into 100,000 ordinary registered A series shares with a nominal value of PLN 250.00 each as well as 2,746,936 ordinary registered B series shares with a nominal value of PLN 250.00 each. All the shares were taken up by Promontoria Holding 418 B.V. and fully covered by a cash contribution.

Share capital structure as at December 31, 2025:

Series/Issue	Type of shares	Number of shares	Nominal value of series/issue (PLN '000)	Capital coverage method
A	Ordinary registered	100,000	25,000	fully paid up
B	Ordinary registered	2,746,936	686,734	fully paid up
Total number of shares		2,846,936		
Total share capital (PLN '000)			711,734	
Nominal value of one share = PLN 250.00				

Change in the number of shares is presented below:

	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024
Number of shares issued and fully paid up		
Balance at the beginning of the period	2,846,936	100,000
Issue	-	2,746,936
Balance at the end of the period	2,846,936	2,846,936

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000
Changes in revaluation reserve relating to financial instruments measured at fair value through other comprehensive income		
Balance at the beginning of the period	(295)	(1,365)
Increase/(decrease) due to revaluation	(44,053)	(58,953)
Accumulated (gain)/loss reclassified to profit or loss on sale/redemption	45,239	60,023
Balance at the end of the period	891	(295)

30. Dividends paid and declared

The parent company neither paid nor declared any dividend in the reporting period.

31. Issues, repurchases and repayments of securities

In the period of 12 months ended December 31, 2025 and in the period of 12 months ended December 31, 2024, the Group did not issue any bonds.

32. Contingent lending and guarantee commitments

Accounting principles

The Group has lending commitments. These commitments comprise approved but not fully activated loans, undrawn credit card limits and overdraft facilities. The Group issues guarantees and letters of credit that secure its clients' fulfilment of their obligations to third parties. The Group charges fees for the contingent commitments given, settled depending on the nature of a given instrument.

Provisions are recognized in accordance with IFRS 9 for off-balance sheet commitments that involve the risk that the client will default on the terms of the agreement.

Financial information

Financial commitments and guarantees given	31-Dec-2025 PLN '000	31-Dec-2024 PLN '000

33. Additional information to the statement of cash flows

Cash and cash equivalents

The Bank recognizes the following as cash and cash equivalents: cash and current account balances with the Central Bank as well as current accounts and overnight deposits with other banks.

Financial information

Cash and cash equivalents	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Cash and balances with the Central Bank	1,857,840	2,089,504
Current receivables from banks, including O/N deposits	16,541	15,985
Total cash and cash equivalents	1,874,381	2,105,489

Explanation of differences between changes in assets and liabilities on the balance sheet and those presented in the statement of cash flows

2025	Balance sheet change	Statement of cash flows	Difference	
	PLN '000	PLN '000	PLN '000	
Change in amounts due from banks and financial institutions	(72,764)	(68,285)	(4,479)	1)
Change in derivative financial instruments (asset)	(180,377)	(115,329)	(65,048)	2)
Change in loans and advances to clients	(3,758,829)	(3,834,969)	76,140	3)
Change in financial instruments measured at fair value through other comprehensive income	(411,594)	7,288	(418,882)	4)
Change in the balance of debt securities measured at amortised cost	5,461,053	(451,639)	5,912,692	5)
Change in other assets	(17,949)	3,349	(21,298)	6)
Change in amounts due to banks and financial institutions	42,680	42,612	68	7)
Change in derivative financial instruments (liability)	529,280	86,912	442,368	8)
Change in amounts due to clients	(2,041,492)	(1,984,378)	(57,114)	9)
Change in provisions	8,438	8,442	(4)	10)
Change in other liabilities	95,145	94,416	729	11)

- 1) "Change in amounts due from banks and financial institutions" – the change in balances of certain receivables constituting cash equivalents (current accounts with other banks) was excluded and presented under "Increase/decrease in net cash", and accrued interest was presented in a separate line item "Interest result".
- 2) "Change in derivative financial instruments (asset)" – does not include the valuation of hedging instruments.
- 3) "Change in loans and advances to clients" – interest presented in a separate line item "Interest result" was excluded.
- 4) "Change in financial instruments measured at fair value through other comprehensive income" – the change in fair value recognised in the revaluation reserve was excluded, as well as cash inflows and outflows, including interest, presented within investing activities.
- 5) "Change in the balance of debt securities measured at amortised cost" – cash inflows and outflows, including interest, presented within investing activities were excluded.
- 6) "Change in other assets" – changes presented within investing activities relating to non-cash changes in fixed assets were excluded.
- 7) "Change in amounts due to banks and financial institutions" – interest presented in a separate line item "Interest result" was excluded.
- 8) "Change in derivative financial instruments (liability)" – does not include the valuation of hedging instruments.

- 9) "Change in amounts due to clients" – interest presented in a separate line item "Interest result" was excluded.
 10) "Change in provisions" – actuarial gains and losses recognised in the revaluation reserve were excluded.
 11) "Change in other liabilities" – interest was excluded.

Changes in liabilities arising from financing activities

2025	As at 01-Jan-2025	change	As at 31-Dec-2025
	PLN '000	PLN '000	PLN '000
Lease liabilities	78,593	(7,477)	71,116

2024	As at 01-Jan-2024	change	As at 31-Dec-2024
	PLN '000	PLN '000	PLN '000
Lease liabilities	92,921	(14,328)	78,593

34. Fair value of assets and liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. For many financial instruments, the market values are unavailable, hence the fair values are estimated with the use of a range of valuation techniques. The fair value of financial assets and financial liabilities was measured using a model based on the estimates of the present value of future cash flows by discounting them using market rates of interest.

For some groups of financial assets and financial liabilities, it was assumed that their carrying amounts approximate their fair values, which is due to a lack of expected material differences between their carrying amounts and fair values resulting from the characteristics of these groups.

34.1. Financial assets and financial liabilities which are not presented at fair value in the statement of financial position

The key methods and assumptions used in estimating the fair values of financial assets and financial liabilities that are not presented at fair value in the consolidated statement of financial position are as follows:

Cash and balances with the Central Bank

The carrying amounts are assumed to approximate the fair values due to the short-term nature of these assets.

Amounts due from banks and financial institutions

Amounts due from banks include mainly deposits made on the interbank market and derivative hedges. Fixed-rate deposits made on the interbank market are short-term deposits. For this reason, it is assumed that the fair values of amounts due from banks approximate their carrying amounts.

Loans and advances to clients measured at amortized cost

The fair value was calculated for loans with a fixed repayment schedule. For agreements where such payments

have not been defined (e.g. overdraft facilities), the fair value is assumed to be equal to the carrying amount. A similar assumption was made for past due payments and impaired agreements.

In order to calculate the fair value, on the basis of information recorded in transaction systems, the timing of principal and interest flows is identified for each agreement. The cash flows so determined were discounted using the risk-free rate and reduced by the value of ECL calculated in accordance with IFRS 9. The resulting amount was discounted taking into account risks associated with credit products.

Other financial instruments measured at amortized cost

The measurement of debt securities (excluding Treasury bonds and bonds guaranteed by the State Treasury) in the portfolio of instruments measured at amortized cost is based on the discounted cash flow model, with the discount rate for unrealized cash flows based on the market discount rate determined by the zero-coupon curve plus the risk margin specific to the particular security.

Depending on the security type and issuer, the margin is calculated as:

- the average margin on loans granted to local government entities recently in the case of municipal bonds;
- the margin of the issue, for securities issued over the past six months, if the issuer is not related to the Bank;
- the adjusted margin on a different security of the issuer;
- the adjusted margin on the security or securities for an issuer (group of issuers) of similar characteristics as the issuer whose security is being measured.

The fair value of securities measured in accordance with the model described above (using margins ranging from 0.54% to 2.00%) is PLN 22,261 thousand. In the case of one-sided shift in the risk margins on securities by 25 basis points, the fair value increases by PLN 111 thousand for a decrease in margins, and decreases by PLN 110 thousand for an increase in margins.

Amounts due to banks and financial institutions

It is assumed that the fair value of deposits from other banks and floating-rate loans obtained on the interbank market approximates their carrying amount.

Amounts due to clients

The fair value was calculated for fixed-rate deposits with specified maturity. The fair value of current deposits is assumed to be equal to their carrying amount. In order to calculate the fair value on the basis of data from transaction systems, future principal and interest flows are determined, grouped by currency, original deposit term, product type and cash flow date. The cash flows so determined are discounted using an interest rate constructed as the sum of the market rate from the yield curve for a given currency and the deposit maturity date as well as the margin earned on deposits placed in the last month of the settlement period. The margin is calculated by comparing the interest rate on deposits placed during the past month with the market rate of interest. The discounting period is defined as the difference between the deposit maturity date (with the accuracy of one calendar month) and the presentation date of the financial statements. The discounted value so determined is compared with the carrying amount, resulting in a difference between the carrying amount and the fair value for the contract portfolio used in the calculation.

Due to the fact that for most financial assets and financial liabilities measured at amortized cost (other than those described in detail above) using the effective interest rate, the next repricing period does not exceed 3 months, the carrying amount of these items does not differ significantly from their fair value.

A summary of the carrying amounts and fair values of financial assets and financial liabilities is presented below:

	31-Dec-2025		31-Dec-2024	
	Carrying amount	Fair value	Carrying amount	Fair value
	PLN '000	PLN '000	PLN '000	PLN '000
ASSETS:				
Cash and balances with the Central Bank	1,857,840	1,857,840	2,089,504	2,089,504
Amounts due from banks and financial institutions	847,778	847,778	775,014	775,014
Loans and advances to clients measured at amortized cost	17,550,683	17,943,369	13,873,435	13,878,628
Financial assets measured at amortized cost	28,135,983	28,797,980	33,597,036	33,556,268
LIABILITIES:				
Amounts due to banks and financial institutions	150,208	150,208	104,017	104,017
Amounts due to clients	49,371,017	49,522,531	51,412,509	51,768,673

The fair values of financial assets and financial liabilities meet the conditions for classification to Level 3.

34.2. Financial assets and financial liabilities measured at fair value in the statement of financial position

The Group classifies individual financial assets and financial liabilities measured and presented in the consolidated financial statements at fair value using the following hierarchy:

Level 1

Financial assets and financial liabilities measured on the basis of quoted prices from active markets for identical instruments. This category includes debt and equity instruments held to collect contractual cash flows or held to be sold, measured at fair value through other comprehensive income or through profit or loss, for which an active market exists.

Level 2

Financial assets and financial liabilities measured using valuation techniques based on quoted market prices that are directly observable or other information based on quoted market prices. This category includes NBP money bills measured based on the reference curve and derivatives.

Level 3

Financial assets and financial liabilities measured using valuation techniques based on quoted market prices which are not directly observable. This category includes shares and interests which are not traded on a regulated market and financial assets whose fair value is determined using internal valuation models.

The table below shows the carrying amounts of financial instruments measured at fair value, broken down into the 3 hierarchy levels:

VELOBANK S.A. GROUP

Consolidated financial statements for the period of 12 months ended December 31, 2025
(figures in PLN '000)

31-Dec-2025	Level 1 PLN '000	Level 2 PLN '000	Level 3 PLN '000	Total PLN '000
ASSETS				
Financial assets measured at fair value through profit or loss	1,739	-	1,110	2,849
Derivative financial instruments	-	288,380	-	288,380
Loans and advances measured at fair value through profit or loss	-	-	173,711	173,711
Financial instruments measured at fair value through other comprehensive income	1,111,312	2,598,557	1,839	3,711,708
LIABILITIES				
Derivative financial instruments	-	677,641	-	677,641

31-Dec-2024	Level 1 PLN '000	Level 2 PLN '000	Level 3 PLN '000	Total PLN '000
ASSETS				
Financial assets measured at fair value through profit or loss	20,737	-	2,903	23,640
Derivative financial instruments	-	108,003	-	108,003
Loans and advances measured at fair value through profit or loss	-	-	92,130	92,130
Financial instruments measured at fair value through other comprehensive income	-	3,298,419	1,695	3,300,114
LIABILITIES				
Derivative financial instruments	-	148,361	-	148,361

In the period of 12 months ended December 31, 2025, there were no transfers between Level 1 and Level 2 of the fair value hierarchy, and no instruments were transferred from Level 1 or from Level 2 to Level 3 of the fair value hierarchy.

Financial instruments measured at fair value on a recurring basis are transferred between the different levels of the fair value hierarchy in the following situations:

- transfer from Level 1 to Level 2 – if no quoted prices from active markets are available for identical instruments at the balance sheet date;
- transfer from Level 2 to Level 3 – if the non-market element taken into account in the valuation techniques used has become material at the balance sheet date.

The valuation techniques and inputs for fair value measurements of financial assets and financial liabilities classified to Levels 2 and 3 of the fair value hierarchy are as follows:

Derivatives

Derivatives of a linear nature are measured based on the discounted cash flow model, using discount and projection curves generated on the basis of market quotes for financial instruments. Discount curves are constructed according to the discounting concept based on the cost of the hedge, using OIS rates, quotes for SWAP points, FRA, IRS, tenor basis swap and CCBS points. Additionally, for purposes of instruments based on a floating interest rate, a projection curve is constructed, based on FRA and IRS quotes as well as relevant benchmark indices.

NBP money bills

They are measured on the basis of a benchmark curve constructed based on short-term interbank deposits.

Shares and interests in unlisted companies

Shares and interests in companies for which no quotes are available on the capital market are measured at fair

value using various valuation techniques, selected depending on, among others, the specific nature of a particular market segment or the availability of observable inputs. The key methods used by the Group include: methods of valuation based on net assets, income-based methods and comparative methods. An exposure may be measured using a combination of two or more techniques. Valuations of selected equity exposures may be prepared by third parties specializing in this type of services.

Loans measured at fair value through profit or loss

The fair value of performing exposures represents the difference between discounted income and discounted costs until the maturity of the exposure. Costs include, among others, the cost to hold capital, the cost to finance liabilities and the expected credit loss on the exposure. For exposures in default, the market value corresponds to the net carrying amount of the exposure (i.e. the gross exposure value less the allowance determined in accordance with IFRS 9) multiplied by a scaling factor that adjusts the net exposure value to the expected selling price of the portfolio. Credit products recognized at fair value were measured at PLN 173,710 thousand. In the case of a decrease in expected credit losses by 10%, the fair value increases by PLN 433 thousand, and it decreases by PLN 433 thousand for an increase in ECL.

Change in financial assets/financial liabilities classified to Level 3:

01-Jan-2025 – 31-Dec-2025	Loans and advances to clients measured at fair value through profit or loss	Financial assets measured at fair value through profit or loss	Other financial instruments
	PLN '000	PLN '000	PLN '000
Balance at the beginning of the period	92,130	2,903	1,695
Gains or losses, including:	2,394	255	144
recognized in profit or loss	2,394	255	-
recognized in other comprehensive income	-	-	144
Change: sale/redemption/acquisition/origination/settlement	79,187	(2,048)	-
Balance at the end of the period	173,711	1,110	1,839

01-Jan-2024 – 31-Dec-2024	Loans and advances to clients measured at fair value through profit or loss	Financial assets measured at fair value through profit or loss	Other financial instruments
	PLN '000	PLN '000	PLN '000
Balance at the beginning of the period	45,708	4,586	1,590

Balance at the end of the period	92,130	2,903	1,695

35. Information on operating segments

The Group's business is focused on the following main segments:

- Retail banking – real estate market financing, vehicle purchase financing, services relating to deposit and investment products for retail clients as well as financing clients' consumption needs through retail loans (mainly cash loans and credit cards) and an offering of insurance products;
- Business banking – lending activity and services to businesses and state budget entities;
- Treasury and ALM – investing liquidity surpluses, interest rate management, transfer pricing.

Management reporting includes the presentation of selected elements of the income statement and balance sheet items broken down by the key segments. The classification of individual types of income, costs and balance sheet items to a specific group is based on the following criteria:

- for credit products – the purpose of loans and advances granted and the borrower type;
- for deposit products – the borrower type, taking into account the classification of funds obtained from individuals through financial entities under framework agreements, for management reporting purposes.

The Group operates in the Republic of Poland.

<i>Industry segment reporting for the period from 01-Jan-2025 to 31-Dec-2025</i>	Retail banking	Business banking	Treasury and ALM	Non- allocated	31-Dec-2025
	PLN '000	PLN '000	PLN '000	PLN '000	PLN '000

36. The Social Benefits Fund

The Act on the Social Benefits Fund dated March 4, 1994 (Journal of Laws *Dz.U.* of 1996, No. 70, item 335, as amended) provides that each employer with 50 or more full-time employees as at January 1 of a given year is obliged to create a social benefits fund. The Fund's purpose is to finance welfare activities. Pursuant to Article 4 of the Act on the Social Benefits Fund, the Bank created the Social Benefits Fund and made appropriate contributions to it, in accordance with the rules laid down in the Remuneration Regulations.

Contributions to the Fund in 2025 amounted to PLN 4,568 thousand.

Contributions to the Fund in 2024 amounted to PLN 3,903 thousand.

Remuneration of the key management personnel

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000
Key management personnel of VeloBank S.A. – number of persons*	66	71
Short-term employee benefits	39,458	31,621
Termination benefits	423	912
Total remuneration	39,881	32,533

*total number of all persons holding positions considered to be the key management personnel for all or part of the period covered by the financial statements

Short-term employee benefits consist of fixed and variable remuneration as well as other benefits representing the costs of salaries in 2025. The amounts presented above do not include any social security charges on remuneration.

The key management personnel include members of the Supervisory Board, members of the Management Board of the Bank and other staff holding positions which have a material impact on the Bank's risks.

Benefits to the parent company's management under the remuneration policy in respect of the variable remuneration component

Variable remuneration of the key management personnel is settled in a transparent manner ensuring effective implementation of the Remuneration Policy of VeloBank S.A. The rules for awarding and payment of variable remuneration to this group of staff, i.e. to persons holding positions with a material impact on the Bank's risk, are defined in detail in the Variable Remuneration Policy, which forms part of the Remuneration Policy. In accordance with the policy, the amount of variable remuneration is determined on the basis of an assessment of a staff member's performance for a period of at least 3 years so that the amount of variable remuneration takes into account the business cycle of the Bank and the risk associated with its business operations. The Bank's performance used in determining variable remuneration components should include the Bank's cost of risk, cost of capital and liquidity risk in the long-term perspective. Staff performance is assessed by reference to financial and non-financial criteria, determined in the form of annual goals.

The amount of variable remuneration awarded and paid must reflect the financial condition of the Bank and an appropriate level of the Bank's cost of risk, cost of capital and liquidity risk in the long term, and may be subject to adjustments in this respect. Moreover, variable remuneration of the key management personnel is

of a conditional nature. It is conditioned, among other things, by the absence of a significant deterioration of the Bank's situation as a result of activities falling within the scope of responsibilities of a given manager, exceeding the cost of risk, cost of capital and liquidity ratios exposing the Bank to significant losses.

Variable remuneration may not exceed 100% of the total annual fixed remuneration received at the Bank. The award and payment of 40% take place after the end of the settlement period and the announcement of the financial results, and the payment of the remainder, i.e. 60% of variable remuneration, respectively, is deferred for five years and divided into equal portions. Variable remuneration, both that awarded and paid in the year following the settlement period and that deferred, is divided in equal parts into cash and financial instruments. In accordance with the regulation, the Bank may apply the Policy to a limited extent, subject to the conditions set out in the Act of August 29, 1997 – Banking Law.

38. Fees of the entity authorized to audit the financial statements

The following table presents the fees paid or due to Deloitte Assurance Polska spółka z ograniczoną odpowiedzialnością Spółka komandytowa for the period ended December 31, 2025 and the fees paid to PKF Consult Spółka z ograniczoną odpowiedzialnością Sp.k. for the period ended December 31, 2024, and for the review of the financial statements for the period of three months of 2025 ended March 31, 2025, by type of service in gross values:

	01-Jan-2025 – 31-Dec-2025 PLN '000	01-Jan-2024 – 31-Dec-2024 PLN '000

NSFR	Stable funding measure	100%	251.46%	282.34%

(*) figures for December 31, 2024 were recalculated with retrospective recognition of the profit for 2024

As at December 31, 2025 and December 31, 2024, the leverage of the VeloBank S.A. Group was as follows:

	31-Dec-2025	31-Dec-2024*
Leverage	3.89%	3.50%
Total exposure measure (in PLN '000)	54,984,086	55,583,518

(*) figures for December 31, 2024 were recalculated with retrospective recognition of the profit for 2024

40. Acquisition of the retail business of Bank Handlowy w Warszawie S.A.

On May 27, 2025, VeloBank and Promontoria Holding 418 B.V. entered into an agreement (the "Agreement") with

Citibank Europe Plc and Bank Handlowy w Warszawie S.A. ("Bank Handlowy") concerning division by spin-off of Bank Handlowy's retail business (the "Transaction").

The first stage of the Transaction will be division of Bank Handlowy by spin-off, as a result of which the retail business will be transferred to VeloBank, in exchange for which Bank Handlowy will receive newly issued shares in VeloBank (the "Division"). The second stage will be repurchase by Promontoria Holding 418 B.V. of all of VeloBank's shares taken up by Bank Handlowy as a result of the Division. The repurchase will take place promptly after the Division is registered by the competent registry court, but no later than on the day following immediately the registration date. On the day when the Division is registered with the registry court, VeloBank will acquire the retail business comprising credit cards, retail loans and advances, including PLN mortgage loans, deposit taking, wealth management (including retail brokerage services) and provision of services to businesses classified by Bank Handlowy as micro-entities, as well as branches of Bank Handlowy and other assets and liabilities related to the retail business, with the exception of some assets and liabilities related to the above business which will not be transferred to VeloBank, including, in particular, foreign currency loans.

According to the balance sheet information as at March 31, 2025, the retail business spun off as part of the Division to VeloBank comprises a portfolio of approx. PLN 6 billion in loans, approx. PLN 22.1 billion in deposits and approx. PLN 8.9 billion in assets under management, with allocated equity of approx. PLN 0.9 billion. The difference between the retail business liabilities and assets

will be covered by current financial assets. The spun off retail business includes all employees of this area (including those representing support functions) totaling approx. 1,650, and branches of Bank Handlowy that provide services to retail clients, which is aimed at ensuring continuation of the provision of services to retail clients.

The closing of the transaction is conditional on the performance of the following actions and fulfilment of certain conditions precedent, including, but not limited to:

- obtaining appropriate approvals or decisions of the Polish Financial Supervision Authority by the Bank, Bank Handlowy and their parent companies;
- obtaining the approval of the competent antitrust authority and other competent authorities;
- obtaining certain tax rulings;
- adopting resolutions approving the division at the general meetings of the shareholders of the Bank and Bank Handlowy;
- achieving readiness to perform technical and operational activities associated with the migration of systems in connection with the division.

On July 25, 2025, the Management Board of VeloBank and the Management Board of Bank Handlowy agreed and signed the draft terms of the division of Bank Handlowy prepared in accordance with Article 534 of the Commercial Companies Code dated September 15, 2000.

The transaction should be settled in mid-2026.

The number of shares to be taken up by Bank Handlowy as a result of the Division will be determined using the mechanism set out in the draft terms of the Division, with a proviso that it shall not reach 25% of all the shares in VeloBank's share capital. The above shares will be repurchased by Promontoria Holding 418 B.V. from Bank Handlowy for the estimated amount of PLN 532 million, made up of two components based on the financial ratios set out in the Agreement:

- 1) a fixed price component payable in connection with the closing of the Transaction, the amount of which is estimated at PLN 432 million, based on the net assets transferred by Bank Handlowy to VeloBank at the time of Transaction closing and subject to the standard price adjustment after the closing of the Transaction; and
- 2) a variable price component, payable depending on the achieved retail business volumes on the closing date of the Transaction, which shall not exceed PLN 100 million.

41. Events subsequent to the end of the reporting period

After December 31, 2025, no events occurred which were not disclosed in these financial statements and which could have a material impact on the future financial performance of the VeloBank S.A. Group.

IV. RISK MANAGEMENT IN THE GROUP

Ownership and operational supervision within the VeloBank Group is exercised through standardized processes of risk management, internal control, budgeting and reporting, taking into account the available legal and corporate governance instruments.

The supervision model is matrix-based – individual business owners responsible for key areas of the Bank's operations exercise oversight over corresponding areas in the subsidiaries.

The applied ownership supervision framework ensures consistency, security and compliance of the procedural framework and the operations of subsidiaries with the Bank's regulations, while maintaining the principle of proportionality to their scale and business profile.

The Bank exercises supervision over risks arising from the activities of subsidiaries within the meaning of banking law as part of consolidated supervision. The Group's risk management system covers all organizational units and takes into account the level and nature of risk exposures as well as all material risks. The proper functioning of the risk management system is ensured by the Bank's Management Board, while the Supervisory Board oversees the system, including assessing its adequacy and effectiveness.

This supervision is carried out through the establishment and periodic review of risk management strategies and policies, which in particular define risk appetite, risk limits, and the principles for risk identification, measurement, monitoring and reporting in subsidiaries.

Credit risk, liquidity risk, market risk and operational risk are of key importance to the Bank. Compliance risk management is also a significant element of the Bank's operations.

The objective of risk management is to stabilize the Bank's financial performance in the long term and, in the short and medium term, to maintain the expected level of asset quality parameters and the desired structure of the balance sheet, as well as ensuring high quality of operating processes to achieve the assumed income to risk ratio.

In line with the applicable requirements, responsibility for risk management at the strategic level rests with the Bank's Management Board. The related objectives have been defined in the "Bank's Risk Management Strategy". At the operational level, risk management is assigned to committees responsible for issuing recommendations and decisions, monitoring individual risks and approving internal risk models. These include, in particular:

- the Bank's Credit Committee;
- the Asset and Liability Management Committee;
- the Operational Risk and Process Quality Committee;
- the Credit Risk and Debt Collection Committee;
- the Model Risk Committee;
- the Bank's Security Committee.

As part of their activities, the committees also make decisions setting the directions of changes in the policies for individual risks on an ongoing basis, issue recommendations as to internal limits and define the risk appetite framework. These tasks are performed as part of the strategies adopted by the Bank's Management Board, taking into account regulatory requirements, including supervisory restrictions. Oversight of the assessment of the effectiveness of the risk management system is exercised by the Bank's Supervisory Board.

1. Credit risk

Credit risk results from a client's potential failure to perform or untimely performance of financial obligations arising

from transactions concluded, in particular credit transactions and transactions in other financial instruments.

Credit risk management at the Bank is aimed at maintaining the loan portfolio with a risk level expected by the Bank, expressed by the realized cost of risk, understood as a ratio of the net balance of allowances recognized in a given period to the average balance of the loan portfolio in the same period. To this end, the Bank manages credit risk at all stages of life of credit transactions, i.e. at the stage of:

- client acquisition and loan granting;
- monitoring of credit exposures, including concentration limits and the financial standing of clients;
- monitoring of the quality of the loan portfolio in relation to the assumed risk appetite;
- forbearance and collection of credit exposures, sale of the non-performing loan portfolio.

The key credit risk management tools are policies and strategies, including industry-specific ones, acceptance rules, statistical models used in the decision-making process for transaction risk assessment and in debt collection strategies to select the optimal recovery path. Credit decisions are made in accordance with the set-up of the credit process, within decision-making competences described in detail in the Bank's procedures. Credit risk is monitored using tools that enable the Bank to identify trends in deterioration of the quality of the portfolio and exposures, as well as evaluating forbearance and debt collection activities.

The Bank consistently pursues its objectives as part of strategic risk management projects. In the reporting period, a number of initiatives were implemented aimed at improving the quality of risk assessment processes and the effectiveness of the loan portfolio. For instance, in the unsecured retail loans segment, a new version of the acceptance model, developed using machine learning methods, was implemented. At the same time, the decision-making rules were adapted to the assumptions and better quality of the model, which translated into a material improvement in the credit process, including the level of automation of credit decisions. In addition, a risk-based pricing approach was implemented, enabling more precise differentiation of pricing depending on the client's risk profile, which supports optimization of portfolio profitability, improvement of its quality and compliance with best market practices. As regards mortgage loans, the acceptance model was re-estimated and its parameterization updated based on the latest data and observed market trends. Debt collection processes were strengthened through further expansion of application tools supporting distressed debt management and the implementation of new solutions at an early stage of debt recovery, based, among others, on the results of the Champion Challenger strategy and on the indications of dedicated statistical models predicting the probability of repayment. Organizational changes were made to reflect the specialization of units dedicated to handling the mass and the business client portfolios.

These measures have directly contributed to the strengthening of controls in the credit process as well as the monitoring of the portfolio and large exposures. In particular, the Bank focused on ensuring a high quality of the loan portfolio, specifically on activities aimed at achieving the target reduction of the NPE portfolio to below 5%, in accordance with the adopted strategy.

Structure and set-up of the credit risk management process

The main participants in the Bank's credit risk management system are:

The Supervisory Board of the Bank

The role of the Supervisory Board is to approve the credit risk management strategy and the credit policy, perform periodic assessments of the Management Board's achievement of the objectives of the Bank's credit strategy and policy, oversee the control of the credit risk management system as well as assessing its adequacy and effectiveness.

The Management Board of the Bank

The Bank's Management Board is responsible for the development, implementation and revision of the strategy and procedures related to the credit risk management system as well as the credit policy, periodic reporting to the Supervisory Board on the implementation of the credit policy and on the functioning of the credit risk management system, maintaining communication with the supervisory authority as well as reporting and making available to that authority all information on credit risk, as required by legal acts. The Management Board of the Bank is also responsible for the development of the credit risk management system and for overseeing credit risk management in all areas of the activities of the Bank and its group. The Management Board of the Bank makes credit decisions regarding exposures in accordance with the adopted levels of decision-making competences.

The Bank's Credit Committee

The Bank's Credit Committee has been appointed to support the activities of the Bank's Management Board by fulfilling consultative and advisory functions in the credit decision-making process, and making independent decisions within the scope of its powers. It is also responsible for issuing recommendations to the Bank's Management Board as to systemic solutions for setting internal limits on exposure to issuers of securities and other banks. The Bank's Credit Committee issues recommendations to the Management Board of the Bank regarding credit exposures which, due to their size, are reserved to the competence of the Bank's Management Board.

The Credit Risk and Debt Collection Committee

The committee is a consultative and decision-making body with respect to the development, design and implementation of the credit policy. The committee is overseen by the member of the Bank's Management Board in charge of the Risk Management Division and the President of the Bank's Management Board. In its consultative role, the committee supports the activities of the Bank's Management Board in defining and implementing credit strategies and policies as well as managing debt collection strategies. The committee makes decisions regarding changes in the key parameters of the credit policy and debt collection strategies. As part of asset quality monitoring, it analyzes detailed reports on the loan portfolio as well as the level of the key risk appetite and credit concentration indicators. Where appropriate, it recommends corrective and remedial actions to the Bank's Management Board.

Credit risk management strategy and processes

The Bank conducts its lending activities in the following key areas:

- mortgage lending;
- unsecured lending to individuals – cash loans, credit cards, overdraft facilities, etc. (retail loans);
- private banking;
- vehicle purchase financing, purchase of lease receivables;
- services to small and medium-sized enterprises, homeowner associations and state budget entities;
- developer finance.

The credit strategy for all these areas is set out primarily in the "Risk Management Strategy for Credit Exposures at VeloBank S.A.", "Risk Management Policy for Non-Retail Credit Exposures" and "Risk Management Policy for Retail Client and Microenterprise Credit Exposures", which lay down the rules and guidelines for lending activities. The credit risk policy is updated on an ongoing basis, to reflect changes in the Bank's business strategy as well as in its legal and regulatory environment.

Credit risk at the Bank is managed on the basis of internal procedures concerning risk identification, measurement, monitoring and control. The risk identification and measurement models are consistent with the profile, scale and complexity of the Bank's business. The Bank consistently applies an approach based on estimating the expected loss (EL).

With a view to separating the key functions in the area of credit risk, separate units responsible for sales, assessment and acceptance of credit risk, monitoring the financial standing of clients as well as the quality and value of collateral have been established in the Bank's structure.

Dedicated employees of the Risk Management Division are responsible for assessing and accepting the risk of individual transactions and formulating recommendations for the relevant decision-making bodies. The procedure for credit decision-making that defines the credit approval authorizations is subject to approval by the Bank's Management Board. Credit approval authorizations are granted to the Bank's employees on a case-by-case basis, depending on their experience and the functions performed, taking into account supervisory guidelines. Credit decisions exceeding the authorizations granted individually are made by dedicated committees. Credit decisions concerning the largest exposures are made by the Management Board of the Bank.

Risk reporting and measurement

The Bank monitors and assesses the quality of its loan portfolio on the basis of internal procedures, which include monitoring performed by the business units as well as dedicated risk units. The results and findings of analyses are presented in periodic reports to the competent bodies of the Bank. The risk monitoring system in place at the Bank includes individual risk monitoring (related to a particular client) and overall monitoring of the Bank's individual loan portfolios in various cross-sections.

The scope of individual risk monitoring includes periodic assessments of the borrower's financial and economic standing, timeliness of payments to the Bank as well as the value and condition of accepted collateral. Both the scope and the frequency of the above reviews are in line with the requirements of external regulations and depend in particular on the type of the borrower, the amount of the credit exposure and the form of collateral.

As part of the overall monitoring of the loan portfolio, credit risk functions perform a number of analyses and activities, including, but not limited to:

- monitoring the quality of the Bank's loan portfolio, including large exposures;
- performing periodic assessments of exposure concentration risk, including industry risk (setting maximum exposure limits for particular industries), concentration risk to single entities and groups of connected clients (monitoring the so-called large exposures);
- assessing the financial standing of counterparty banks, setting maximum exposure limits for individual banks;
- performing stress tests;
- analyzing changes in the macroeconomic environment in terms of their potential impact on asset quality and collateral policy;
- monitoring the quality of the statistical models used;
- providing management information in the form of periodic reports to the Bank's Management Board and Supervisory Board.

It is the Bank's objective to limit the concentration of exposures to single clients or groups of connected clients. The Bank's Management Board established a threshold for large exposures. The internal limit – the sum of large exposures may not be higher than 400% of the Bank's Tier 1 capital (the exclusions under Article 400 of the CRR Regulation and the Regulation of the Minister of Finance dated July 1, 2016 on exposures of banks excluded from large exposure limits are taken into account when calculating the limit utilization). The Bank's large exposure to a client or a group of connected clients is one whose value is equal to or exceeds 5% of the Bank's Tier 1 capital.

Risk mitigation policies

With a view to mitigating credit risk, the Bank applies a wide range of legally permitted collateral, selected based on the characteristics of products, to ensure that the type and object of collateral as well as its value are adequate

to the risk associated with the client and the transaction. Detailed rules for selecting, using and pledging collateral are contained in internal regulations and product procedures of the individual commercial areas. Collateral accepted by the Bank should ensure that the Bank will satisfy its claims in the event of the borrower's default on the loan agreement. When selecting collateral, the Bank takes into account the type and amount of the loan, the loan term, the legal status and financial condition of the borrower, as well as the Bank's risk and other threats. Preference is given to collateral that guarantees full and quick recovery through debt collection.

The typical forms of collateral required by the Bank are as follows:

For mortgage loans, the basic collateral is a first-rank mortgage created on real property, as well as the assignment of rights from the insurance policy against fire and other random events.

In the case of loans for vehicle purchase, including purchased lease receivables, the range of collateral acceptable to the Bank includes in particular: a registered pledge on the vehicle, partial or full transfer of the ownership right to the vehicle, alienation with a condition precedent or assignment of rights under the comprehensive insurance policy to the Bank. The Bank may require additional collateral in the form of a civil-law guarantee given by third parties or alienation of movable property.

Collateral for consumer loans may include an insurance policy and a personal guarantee (e.g. a third-party guarantee in the form of a promissory note or a civil-law guarantee).

Business loans may be secured by such physical collateral as a first-rank mortgage created on real property, a registered pledge, a lien on rights, a deposit, funds blocked in a bank account, a pledge on cash deposited in an escrow account, personal guarantees such as a blank promissory note, a surety, the borrower's declaration of submission to enforcement under Article 777 of the Civil Procedure Code or a guarantee.

Reform of interest rate indices

Since 2022, work has been carried out in Poland by the National Taskforce on Benchmark Reform (Narodowa Grupa Robocza – NGR). NGR's task is to prepare the process of effective implementation of a new RFR on the Polish financial market.

In March 2024, the NGR Steering Committee, at the request of the Ministry of Finance, decided to conduct a review and analysis of alternative RFR rates that could replace WIBOR. The work took into account WIRON and other interest rate benchmarks that could be developed. Following the review and analysis and as a result of public consultations, a benchmark considered to be the most adequate to meet market expectations was selected.

On December 10, 2024, the NGR Steering Committee announced the selection of a benchmark with the technical name of "WIRF" as the ultimate replacement for WIBOR. Thus, the NGR Steering Committee verified and modified its earlier decision to choose WIRON. On January 24, 2025, the NGR Steering Committee decided to choose the target name: POLSTR (Polish Short Term Rate) for the proposed benchmark.

In view of the change and selection of the POLSTR indicator, a new reform Roadmap was adopted, which provides for discontinuation of the WIBOR benchmark and the widespread use of POLSTR by 2028 at the latest.

Officially, the POLSTR index began to be provided on June 2, 2025, and as of September 1, POLSTR has gained the status of a benchmark in accordance with the requirements of the BMR Regulation. Analytical documentation and recommendations developed by the NGR have also been published, defining the standards for the application of POLSTR to credit products, debt instruments and derivatives.

On November 21, 2025, the Ministry of Finance issued the first Treasury bonds based on the POLSTR indicator during a sale auction. Since November 26, 2025, the bonds have been listed on the Treasury BondSpot Poland

(TBSP) market and on the BondSpot and WSE regulated markets.

In 2025, VeloBank S.A., like other banks and financial institutions, began work on gradual implementation of the newly selected benchmark into contracts and financial instruments offered. In accordance with the assumptions underlying the NGR Roadmap, in 2026 financial institutions should start selling credit products – to individual, corporate and institutional clients alike – with interest rates based on the compound rate determined on the basis of the POLSTR index. In 2026, work aimed at bringing the IT systems, internal procedures and contractual documentation fully into line with new market requirements is expected to be completed.

From 2028, the NGR Roadmap assumes that market participants will be ready for the Administrator to discontinue the development and publication of the WIBID and WIBOR benchmark rates. Following the entry into force of the Regulation of the Minister of Finance, existing contracts and instruments referencing WIBOR will be converted in accordance with the principles set out therein. In the interest clauses of contracts and instruments to which the replacement rate applies, the replacement rate and the adjustment spread specified in the Regulation of the Minister of Finance will be implemented.

Impact of the IBOR reform on hedge accounting

Within established hedging relationships, the Bank identifies WIBOR as a benchmark rate subject to uncertainty arising from the benchmark reform. As at the reporting date, WIBOR is quoted on a daily basis and remains available for use, and the related cash flows are exchanged with counterparties in the normal course of business.

In the case of WIBOR, in the Bank's assessment, there is uncertainty regarding the timing and amounts of cash flows under the new benchmark rate. Taking into account the IFRS provisions related to benchmark reform, the Bank does not assume that the implementation of the WIBOR reform will result in the inability to continue existing hedging relationships, and any potential hedge ineffectiveness should not affect the fulfilment of hedge effectiveness tests for these relationships.

In the reporting period ended, the Bank applied the reliefs arising from the WIBOR benchmark reform related to hedge accounting in accordance with IAS 39 for hedging relationships directly affected by uncertainty related to the WIBOR benchmark rate. The reliefs were applied to hedges referencing WIBOR within cash flow hedge relationships. The Bank will discontinue the application of these reliefs at the time and on the basis of contractual modifications, primarily related to the implementation of the replacement rate together with the adjustment spread in place of the current WIBOR reference rate.

As at December 31, 2025, the notional amount of IRS contracts within active hedging relationships designated for cash flow hedge accounting amounts to PLN 23,850,000 thousand.

Forbearance

The Bank's forbearance activities are intended to maximize the effectiveness of distressed debt management, i.e. to ensure the highest recovery with reduced costs incurred to recover the debts, which are ultimately imposed on the obligor. Forbearance consists in changing the terms of debt repayment, which are agreed individually for each agreement. Forbearance of a credit exposure involves renegotiation or modification of the terms of the loan agreement, receivables or held-to-maturity investment, resulting from the financial difficulties of the obligor or issuer.

The list of (forbearance) concessions offered to the client in connection with their difficult financial situation includes, in particular, such measures as:

- extension of the repayment period;
- deferral of the repayment date (grace period) of the principal and/or interest;

- periodic reduction of the amount of installments as compared to the adopted schedule;
- transfer of due and payable amounts to future installments;
- interest rate change, decision not to accrue interest over a specified period of time;
- agreement on the conditions for collateral release or sale;
- change of the order in which the repayments will be recognized, as set out in the agreement (payments to be recognized first as repayment of the principal amount);
- cancellation of the unpaid debt in whole or in part;
- conversion of the debt in whole or in part into shares or interests in the obligor's assets, takeover of the obligor's assets in exchange for discharge of debt in whole or in part;
- provision of new banking products to support the forbearance program;
- debt refinancing (use of debt agreements).

The Bank renegotiates agreements with obligors who found themselves in a difficult financial situation and are unable to comply with the original terms and conditions of the loan agreement. The forbearance process involves an assessment of the obligor's ability to perform the obligations set out in the forbearance annex (i.e. to repay the debt at the agreed dates). When granting a (forbearance) concession to a client, the Bank makes appropriate entries in its systems to enable identification of the portfolio of forborne exposures. Forborne exposures are subject to monitoring.

For purposes of calculating write-offs, the Bank has defined a list of activities that result in identification of the prerequisite for forbearance in relation to a loan agreement. These include, but are not limited to, capitalization of due and payable amounts, extension of the repayment date or cancelation of part of the debt. An exposure is not considered to be forborne if the obligor is not experiencing financial difficulties. Exposures with an active forbearance prerequisite may be classified as Stage 2 (performing) or Stage 3 (non-performing) in accordance with the applicable regulatory guidance. Such exposures are classified as forborne until the end of the conditional period, the minimum duration of which is 24 months. The conditional period begins when a non-performing exposure is reclassified as performing (after at least 12 months of quarantine) or when performing forbearance is identified.

The figures for forborne exposures included in the calculation of impairment losses are presented below:

Forborne exposures 31-Dec-2025	Gross value – Stages 1 and 2 PLN '000	Gross value – Stage 3 PLN '000	Impairment losses on loans and advances – Stages 1 and 2 PLN '000	Impairment losses on loans and advances – Stage 3 PLN '000	Total net value PLN '000

Seated outside Poland	0.11	0.21
Total	100.00	100.00

Credit risk concentration

In accordance with the applicable regulations, the Bank's exposure to a client must not exceed 25% of the Bank's Tier 1 capital. In 2025, the large exposure limits were not exceeded.

Large exposures according to Article 392 of the CRR as at December 31, 2025.

	Percentage share of the portfolio
Group 1	1.0%
Group 2	0.4%
Group 3	0.4%
Client 1	0.0%
Client 2	0.0%
Total	1.8%

Large exposures according to Article 392 of the CRR as at December 31, 2024.

	Percentage share of the portfolio
Group 1	1.0%
Client 1	0.4%
Group 2	0.4%
Client 2	0.0%
Client 3	0.0%
Total	1.8%

The maximum exposure to credit risk as at December 31, 2025 and December 31, 2024 without taking into account accepted collateral or other elements improving the lending terms is presented below:

Maximum exposure to credit risk	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Financial assets:		
Cash and balances with the Central Bank (excluding cash)	1,760,149	1,993,411
Amounts due from banks and financial institutions	847,778	775,014
Financial assets measured at fair value through profit or loss	2,849	23,640
Derivative financial instruments	288,380	108,003
Loans and advances to clients	17,724,394	13,965,565
measured at amortized cost	17,550,683	13,873,435
measured at fair value through profit or loss	173,711	92,130
Other instruments measured at fair value through other comprehensive income	3,711,708	3,300,114
Bonds measured at amortized cost	28,135,983	33,597,036
Other assets	36,601	46,005
Total financial assets	52,507,842	53,808,788
Guarantee commitments	168,233	66,674
Contingent financial commitments	2,177,536	2,094,519
Total off-balance sheet liabilities	2,345,769	2,161,193
Total exposure to credit risk	54,853,611	55,969,981

The Group uses funded and unfunded credit protection with respect to the banking book. No CRM techniques are used for transactions comprising the trading book.

As regards funded protection, the Group applies the standard method of credit risk mitigation techniques in the form of the financial collateral comprehensive method for the most liquid financial collateral (deposits and NBP and Treasury securities).

With respect to unfunded protection, the Group applies guarantees provided by recognized credit protection providers, i.e. selected institutions such as Bank Gospodarstwa Krajowego, the Bank Guarantee Fund and the State Treasury.

In connection with the use of unfunded credit protection, the Group analyzes the risk of excessive concentration to a single credit protection provider or on account of the use of this protection instrument.

The amount of collateral used in the calculation of impairment losses on individually significant loans was:

- PLN 105 million as at December 31, 2025;
- PLN 179 million as at December 31, 2024.

The value of foreclosure assets was PLN 1,731 thousand in 2025 versus PLN 584 thousand in 2024.

Information on the credit quality of financial assets as at December 31, 2025 and December 31, 2024 is presented below:

2. Operational risk

Operational risk denotes the risk of losses resulting from inadequate or unreliable internal procedures, human resources and systems or from external events, including but not limited to, legal risk, model risk or ICT risk, but excluding strategic risk and reputational risk.

The strategic objective of operational risk management is the optimization of the internal business and non-business processes, enabling the reduction of costs and losses and the improvement of the operational security and mitigation of reputational risk. Operational risk management is aimed at preventing threats, effective decision-making, prioritization and allocation of resources, ensuring a better understanding of potential risk and its possible adverse effects.

The primary objective of operational risk management is to strive to identify operational risk and to measure its level and assess its profile as precisely as possible. To this end, solutions concerning the model of operational risk measurement and management are being improved, taking into account Group-specific factors and parameters of operational risk, i.e. ones closely related to its business profile.

Structure and set-up of the operational risk management unit

The organizational units responsible for operational risk management include:

- systemic units, also referred to as subject-matter systemic units – acting as the second line of defense, responsible for systemic operational risk management, designing internal regulations and developing solutions for day-to-day operational risk management, performing also tasks relating to day-to-day operational risk management;
- operational units – acting as the first line of defense, involved in day-to-day management of operational risk inherent in their everyday activities.

In all areas and at all levels of the Bank's organizational structure, including in related parties and third parties, the following groups of units, staff and functions responsible for operational risk management activities performed at the following three levels, are identified:

- Level 1: basic – units and staff responsible for operational risk management in their everyday activities;
- Level 2: supervisory (management) – staff holding managerial positions, performing functional control;
- Level 3: superior, functioning in a centralized form – the main operational risk management function performed by individuals carrying out the tasks of a separate operational risk management unit, functioning within the Operational Risk Management Team, which acts as the second line of defense, and the Operational Risk, Quality and Processes Committee.

The leading role in operational risk management at the Bank is performed by its governing bodies, namely the Supervisory Board and the Management Board of the Bank.

The activities of the Bank's Management Board, at the operational level, are performed by the Operational Risk, Quality and Processes Committee. It is responsible for monitoring operational risk, issuing opinions on regulations concerning operational risk management and formulating recommendations as to risk exposure measures and standards.

The main, superior role in operational risk management at the Bank is performed by designated staff of a separate independent operational risk management unit – the Operational Risk Management Team, which is part of the Risk Management Division in the Risk Control and Validation Department.

Operational risk management strategies and processes, including the scope and type of operational risk reporting and measurement systems

Operational risk management is a process which encompasses activities involving risk identification, measurement, mitigation, monitoring and reporting. It covers all processes and systems, with a particular focus on those related to the performance of banking activities that ensure the provision of financial services to clients.

The Bank manages its operational risk in accordance with the "Operational Risk Management Strategy" developed by the Management Board and approved by the Bank's Supervisory Board:

- taking into account the prudential regulations arising from the Act as well as relevant resolutions and recommendations of the banking supervision authority;
- containing a description of the policies already in place at the Bank and those that are under development and planned for the future.

The existing operational risk reporting and measurement system is supported by an IT system that allows the Bank to record operational risk events, including the effects of their occurrence. At the same time, it is the base and environment for cross-sectional analysis of operational risk, providing the basis for risk measurement and for the operational risk reporting system, which includes reports for internal (management) and external (supervisory) purposes.

Management and supervisory reporting is based on assumptions resulting from:

- the guidelines formulated in Recommendation M of the Polish Financial Supervision Authority on operational risk management at banks;
- supervisory regulations setting out the rules and methods for publishing qualitative and quantitative information on capital adequacy by banks.

Operational risk measurement includes, among others, the calculation of:

- the own funds requirement for operational risk;
- the ratios determining the degree of the Bank's susceptibility to operational risk, also known as the Bank's sensitivity to operational risk or the Bank's exposure to operational risk;
- the aggregate volume of actual losses.

Operational risk mitigation policies

Depending on the level and profile of operational risk, appropriate corrective and preventive measures are applied, which are adequate to the diagnosed risk and ensure the selection and implementation of effective measures to modify the risk. In particular, the following methods of mitigating operational risk are used:

- development and implementation of business continuity plans (including contingency plans), ensuring uninterrupted operation of the organization at a specified level;
- insurance against the consequences of hard-to-predict errors or operational events with significant financial consequences;
- outsourcing of activities.

In addition, in order to secure any processes requiring the transfer of funds, operational risk is eliminated mainly by introducing the four-eyes principle.

The key business processes have been described in the relevant policies and procedures. The correctness of business operations is monitored on an ongoing basis, and reports are submitted directly to the Management Board.

The effectiveness of the security measures and methods used by the Group to mitigate operational risk is monitored by continuous tracing, collection and analysis of operational events and operational risk profile observations as well as control of qualitative and quantitative changes in operational risk.

3. Liquidity risk

Liquidity risk is defined as the potential inability of the Group to fulfil its current and future financial obligations. Liquidity management is an obvious, key element of risk management at the Group. The objective of liquidity risk management at the Group is to ensure the possibility of the fulfilment of obligations on a daily basis, the ability to maintain liquidity in the short, medium and long term both under normal conditions and in the case of crisis events (at the Bank and market level).

For effective liquidity management, the Group adequately shapes the structure of its assets and liabilities through the deposit and credit policy, product pricing, etc. In this respect, the Group is guided, on the one hand, by the current, short-term liquidity needs, as well as a long-term strategy aimed at building the Bank's liquidity profile based on growing, stable sources of funding, including efforts to maintain the relationship-based model, which will ensure, among other things, an increase in permanent sources of funding in the form of core deposits in current and savings accounts of retail clients and from the segment of small and medium-sized enterprises, reducing the importance of term deposits in the Group's funding.

The Bank's approach to liquidity risk management is defined in the "Liquidity Risk Management Policy" and in each Financial Plan adopted for the given year or the strategic assumptions adopted by the Bank's Supervisory Board. These documents define, among other things, the risk tolerance level understood as the maximum risk exposure that may not be exceeded.

The Group's activities in the area of liquidity risk management are in line with the recommendations and prudential regulations of the Polish Financial Supervision Authority and of the National Bank of Poland, but also with the Regulations of the European Union. The Bank's liquidity risk management process, both at the strategic and operational level, is aligned with the requirements of Recommendation P of the Polish Financial Supervision Authority.

The Group identifies the following groups of risk factors to which it is exposed:

- risks arising from external factors (changes in the volume of the deposit balance in the system, the macroeconomic situation);
- risks arising from internal factors (such as the ability to maintain stable sources of funding, including the ability to renew client deposits at an acceptable cost).

Maintaining current, short-, medium- and long-term liquidity amounts to the achievement of the following objectives by the Bank:

- maintaining the desired structure of the balance sheet;
- financing loans granted by the Bank with own funds and funds from stable sources;
- using unstable liabilities as a source of funding of easily marketable assets;
- securing quick and easy access to external sources of funding.

Oversight of the management of medium- and long-term liquidity, including ensuring stable funding for long-term liabilities under both normal and stressed conditions, is the responsibility of the Bank's Management Board, while the management of current and short-term liquidity is the responsibility of the Treasury Area in accordance with the scope of powers granted to it and within the applicable liquidity risk limits. Oversight of the current and short-term liquidity management process is exercised by the member of the Management Board in charge

of the Treasury Area. The Asset and Liability Management Committee performs a consultative and advisory role in the process of liquidity management. The Financial Risk, Asset Valuation and Capital Requirements Department within the Risk Management Division is responsible for controlling liquidity risk management. Its major tasks include monitoring the key liquidity risk measures, developing risk measurement methods and formulating recommendations as to internal limits and prudential standards in this respect.

The Bank's regulations cover also aspects relating to the management of intraday liquidity.

The assessment of liquidity risk involves the monitoring of:

- supervisory liquidity standards, including LCR (liquidity coverage ratio) and NSFR (net stable funding ratio);
- internally determined measures of asset maturity mismatch, balance sheet structure ratios, measures of concentration and measures of stability of funding sources;
- results of stress tests taking into account crisis scenarios referring to internal factors as well as factors relating to the situation on the financial markets; and ESG factors.

The basic measures, key liquidity measures and the level of utilization of liquidity limits (including compliance with the LCR and NSFR supervisory liquidity standards) are subject to daily monitoring and reporting to the Bank's Management Board.

Once a month, the Financial Risk, Asset Valuation and Capital Requirements Department prepares a report summarizing the Bank's liquidity situation. The report contains, among others, information about:

- the level of the key liquidity ratios (including the supervisory measures);
- the structure and level of liquid funds;
- the liquidity gap;
- the stability of the sources of funding.

On a quarterly basis, the scope of the report is extended to include the results of stress tests (also ESG risk).

The report is submitted to the Asset and Liability Management Committee and to the Bank's Management Board.

Information on the liquidity situation together with information on the achievement of the strategic objectives (including, but not limited to, the risk tolerance) is provided at least quarterly to the Risk Committee of the Supervisory Board and to the Supervisory Board.

The process of evaluating the implementation of the liquidity risk management policy and assessing the adequacy of liquidity resources (ILAAP process) is carried out at the Bank on an annual basis. The process includes both a quantitative assessment of, among other things, the achievement of the strategic objectives for liquidity risk or the results of stress tests, and a qualitative assessment, i.e., among other things, the completeness and adequacy of the policies/strategies in place at the Bank, access to the market, the contingency plan and other elements.

To ensure the desired level of liquidity, the Group determines the structure of its assets and liabilities in line with the adopted internal limits and the recommendations issued by the Polish Financial Supervision Authority and the National Bank of Poland; for this purpose:

- it maintains liquidity reserves in safe and liquid financial market assets;
- it has a possibility of using additional sources of funding such as the lombard facility or the technical facility provided by the National Bank of Poland;
- lending activity is financed mainly with own funds and a stable deposit base;
- it is operationally ready to apply to the National Bank of Poland for a refinancing loan (the available loan amount is verified periodically).

The effectiveness of liquidity risk management (including its mitigation) is assessed on the basis of the level

of utilization of the adopted risk exposure limits, including supervisory limits and more broadly through the ILAAP process described above.

The Group carries out simulations of its resilience to increased cash outflows (stress tests). Such analyses are an important part of the asset and liability management process. The Bank has adopted a procedure to be followed in situations which could lead to a significant increase in liquidity risk, i.e. the "Procedure Regarding the Liquidity Contingency Plan for Crisis Situations at VeloBank S.A.".

The above-mentioned procedure sets out, among others, indications of deterioration of the Bank's liquidity situation, the so-called warning and crisis state, which are intended to identify any potential threats in advance. They are monitored on a daily basis. In the event of a situation that poses a threat to the Bank's liquidity, the Management Board and the Asset and Liability Management Committee are informed of the occurrence of the threat.

In 2025, the Group met the supervisory liquidity security requirements, including the supervisory liquidity standards such as LCR or NSFR.

The table below presents the supervisory measures for the Group as at the end of 2025 and 2024:

Supervisory liquidity measures		Minimum value	31-Dec-2025	31-Dec-2024*
LCR	Short-term liquidity measure	100%	564.72%	755.35%
NSFR	Stable funding measure	100%	251.46%	282.34%

(*) figures for December 31, 2024 were recalculated with retrospective recognition of the profit for 2024

The LCR ratio was stable in 2025. During the analyzed period, the ratio was maintained at a level above approx. 690% and it did not fall below 540% in 2025.

The Bank's liquid funds account for more than a half of the Bank's assets (ca. 55%). Net loans to amounts due to clients is approx. 36%. During the entire analyzed period, it remained at an average level of approx. 31%.

Client deposits constitute the primary source of funding for the Bank's lending and investing activities and account for approximately 97% of the Bank's funding sources (excluding equity). Retail client deposits constitute the major part of client deposits (currently accounting for about 89% of the volume), while deposits from corporate entities and local government entities complement the Bank's sources of funding.

4. Market risk

Market risk is the possibility of the Group suffering losses as a result of the volatility of market factors, most of all interest rates, foreign exchange rates and security prices as well as other, including derivative financial instruments. The Group's objective is to optimize the relation of its income to the risk taken by means of the adopted asset and liability management policy as well as a system of market risk limits (including supervisory ones).

The Bank's approach to market risk management is defined in the "Risk Management Policy with Respect to Market and Interest Rate Risk in the Banking Book" and in each Financial Plan adopted for the given year or the strategic assumptions adopted by the Bank's Supervisory Board. These documents define, among other things, the risk tolerance level understood as the maximum risk exposure not to be exceeded.

The Bank's Management Board is responsible for overseeing market risk management at the overall Bank level. The Asset and Liability Management Committee performs a consultative and advisory role in the risk management process. The role of the Management Board/Committee is to design the asset and liability management policy, set the risk limits and monitor their utilization. In operational terms, the Treasury Area is responsible for market risk management by performing ongoing monitoring of risk positions and shaping their level by entering into transactions on the interbank market and by defining foreign exchange rates and transfer rates for transactions with clients.

The Financial Risk, Asset Valuation and Capital Requirements Department within the Risk Management Division is responsible for controlling market risk management. Its major tasks include monitoring the key market risk measures, developing risk measurement methods and formulating recommendations as to internal limits and prudential standards in this respect. The Financial Risk, Asset Valuation and Capital Requirements Department submits information on the market risk level to the Asset and Liability Management Committee and the Bank's Management Board on a monthly basis and provides, at least quarterly, synthetic information on the risk level to the Risk Committee of the Supervisory Board and to the Supervisory Board.

4.1. Currency risk

The Group's currency risk arises from the adverse impact of exchange rates fluctuations on the Bank's financial results. The primary objective of currency risk management is to shape the structure of the Group's foreign exchange position with a view to minimizing its sensitivity to exchange rate volatility. The tool serving this purpose is a system of monitoring internal limits and prudential standards arising from supervisory regulations. The Bank offers its clients primarily deposit and credit products in PLN, which do not affect the level of currency risk. The Bank also offers its clients financial instruments to hedge currency risk (FX spot, forward and option transactions). Derivative transactions and treasury transactions in the trading book are limited to hedging the risks arising from transactions concluded with clients.

The Treasury Area monitors the level of the open foreign exchange position on an ongoing basis and matches its size by means of foreign exchange transactions concluded on the interbank market. These are predominantly spot transactions. In addition, the Bank enters into derivative transactions within internal limits.

The analysis of the Bank's exposure to currency risk is performed using standard market methods based on estimation of the impact of volatility on profit or loss and on the utilization of internal limits reducing the foreign exchange position. The key methods in this respect include:

- measurement of the Value of Risk (VaR);
- stress tests;
- analysis of the size of the foreign exchange position and calculation of the capital requirement for currency risk.

The Bank's exposure to currency risk is controlled on a daily basis and, if the exposure is too high, appropriate information is communicated to the Bank's management. The Financial Risk, Asset Valuation and Capital Requirements Department submits a full set of information on changes in currency risk to the Asset and Liability Management Committee and to the Bank's Management Board on a monthly basis. Among other things, the report contains information on the size of the Bank's foreign exchange positions in individual currencies, the size of the risk measures, the results of the stress tests and the degree of utilization of the limits on open foreign exchange positions for the prior period. Synthetic information on currency risk management, including information on the achievement of the strategic objectives (along with the risk tolerance) is provided to the Risk Committee of the Supervisory Board and to the Supervisory Board.

The process of currency risk management and measurement as well as its control and monitoring is supported by a number of IT tools whose key element is the Market and Liquidity Risk Analysis System (SARRP).

Sensitivity analysis – currency risk

VeloBank S.A. prepares an analysis of its sensitivity to currency risk on a daily basis:

VAR (1D, 99.9%)	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
Currency risk	9	31

This method is based on the Value at Risk (VaR) model and consists in examining, with 99.9% probability, the amount of the maximum loss that the Bank may incur on a single day from the valuation of its foreign exchange position (as a result of changes in foreign exchange rates), assuming normal market conditions. The volatility used in the model is calculated using exponentially weighted moving average (EWMA) of daily relative changes in foreign exchange rates over the past 251 business days. A time series of the same length was used to determine the matrix of correlation between particular foreign exchange rates. Obviously, the VaR measure does not express the absolute maximum loss to which the Bank is exposed. VaR is a measure that determines the level of risk at a given point in time, reflecting the positions for a specific moment, which do not have to reflect the risk of the Bank's position at another point in time, and is a tool for day-to-day management of the foreign exchange

position.

The Group does not maintain open foreign exchange positions at a level which would generate significant foreign exchange risk in any currency. In 2025, the average level of the total foreign exchange position (the higher of the sum of the net long and the sum of the net short positions in individual currencies) was PLN 2.0 million (0.1% of TIER 1 capital), while the maximum level in 2025 was PLN 11.6 million (0.5% of TIER 1 capital).

The tables below present the currency exposure by the type of assets, liabilities and off-balance sheet liabilities:

4.2. Interest rate risk

Interest rate risk is defined as the risk of a decrease in the expected interest income as a result of changes in the market interest rates and the risk of changes in the value of open on- and off-balance sheet positions which are sensitive to changes in market interest rates. The Bank undertakes measures aimed at mitigating the impact of the adverse changes on its financial result. Oversight of interest rate risk management is the responsibility of the Bank's Management Board, which receives and analyzes global reports concerning this risk on a monthly basis and information about the level of the exposure of the trading book to risk on a weekly basis.

The Bank's primary objective with regard to the management of interest rate risk in the banking book is to mitigate the risk of a decrease in the expected interest income as a result of changes in the market interest rates as well as maintaining the values of the open on- and off-balance sheet positions which are exposed to changes in the market interest rates within a range that does not pose a threat to the Bank's safety. To this end, the Bank sets thresholds to reduce the level of risk, i.e. risk tolerance and limits.

The Bank's primary objective with regard to the management of interest rate risk in the trading book is to generate an additional profit on the portfolio of financial instruments through the use of forecast changes in the market interest rates within the scope of the authorizations held and limits set, i.e. within a range that does not pose a threat to the Bank's safety. Derivative transactions and treasury transactions in the trading book are limited mainly to hedging risks arising from treasury transactions concluded with clients. The scale of the Bank's operations in the trading book is insignificant.

Interest rate risk management amounts to minimizing the risk of an adverse impact of a change in the market interest rates on the Bank's financial position by e.g.:

- setting and adhering to limits reducing the acceptable interest rate risk level;
- offering credit products based on floating and fixed interest rates. As far as the deposit offering is concerned, the Bank focuses on administered-rate savings and current accounts as well as fixed-rate term products;
- in order to minimize interest rate risk, the Bank carries out transactions that affect the structure of the balance sheet and reduce the Bank's exposure to interest rate risk – primarily the purchase/sale of fixed- or floating-rate debt securities, derivative transactions (e.g.: Interest Rate Swap and FRA);
- to mitigate the adverse impact of the conclusion of risk hedging transactions on its profit or loss, the Bank has implemented and applies hedge accounting;
- when investing excess cash, the Bank considers the interest rate risk profile.

The effectiveness of risk management (including its hedging) is assessed on the basis of the level of utilization of limits on the exposure to risk as well as supervisory thresholds.

The Bank follows the EBA guidelines on interest rate risk and credit spread risk (CSRBB) management.

Interest rate risk is monitored, among others, through:

- an analysis of assets, liabilities and equity as well as off-balance sheet items sensitive to changes in interest rates broken down by the currency, according to the interest rate repricing date. The analysis takes into account, among other things, the modeling of positions with unspecified maturity;
- an analysis of basis risk, yield curve risk and option risk;
- testing the sensitivity of the net interest income to changes in interest rates (ΔNII);
- testing the sensitivity of the economic value of equity to changes in interest rates (ΔEVE);
- an analysis of the value at risk for the Bank's portfolio related to market valuation (VaR method);
- stress tests (including supervisory and reverse stress tests), showing the susceptibility of the Bank to losses in case of unfavorable changes in market conditions, in case the key assumptions of the Bank become invalid and in case the ESG risk scenario plays out;

- an analysis and testing of the sensitivity to credit spread risk (CSRBB);
- an analysis of the level of the interest margin and its impact on the Bank's profit or loss.

The process of interest rate risk management and measurement as well as its control and monitoring is supported by a number of IT tools whose key element is the Market and Liquidity Risk Analysis System (SARRP).

The Financial Risk, Asset Valuation and Capital Requirements Department monitors interest rate risk parameters and provides a full set of information on changes in interest rate risk to the Asset and Liability Management Committee and to the Bank's Management Board. The report contains, among other things, information on the level of the risk measures and the degree of utilization of individual internal limits. On a quarterly basis, the scope of the report is extended to include the results of stress tests (including reverse stress tests and ones considering the impact of potential ESG risks), as well as an analysis of credit spread risk (CSRBB). Synthetic information on interest rate risk management, together with information on the achievement of the strategic objectives (including the risk tolerance) is provided at least quarterly to the Risk Committee of the Supervisory Board and to the Supervisory Board.

Sensitivity analysis – interest rate risk

VeloBank S.A. prepares an analysis of its sensitivity to interest rate risk in the banking book on a monthly basis:

Shock scenarios used for supervisory purposes*	31-Dec-2025		31-Dec-2024	
	Δ EVE	Δ NI	Δ EVE	Δ NI
	PLN million	PLN million	PLN million	PLN million
Parallel increase in shock	(72)	(18)	(186)	(39)
Parallel decrease in shock	49	(87)	73	(82)
More severe shock (decrease in short-term and increase in long-term rates)	76	-	42	-
More moderate shock (increase in short-term and decrease in long-term rates)	(314)	-	(136)	-
Increase in shock for short-term rates	(280)	-	(184)	-
Decrease in shock for short-term rates	239	-	86	-

* The stress tests are presented in accordance with the EBA IRRBB guidelines

The Δ NI measure means a potential change in the Bank's net interest income over the next 12 months if interest rates change by a specified number of basis points (parallel shift in the yield curve) for particular currencies.

The Δ EVE measure represents a potential change in the Bank's economic value of equity if interest rates change by a specified number of basis points (shift in the yield curve in line with a given scenario) for particular currencies.

When measuring its exposure to interest rate risk, the Bank takes into account the impact of assumptions regarding deposits with unspecified maturity, i.e. current deposits and savings accounts, by estimating the stable portion held in such accounts. The maturity/repricing date for such items is modeled on the basis of a dedicated model for this type of balance sheet items.

In order to supplement information on the Bank's potential loss due to adverse changes in interest rates, stress tests are also carried out quarterly, involving the simulation of the impact of major changes in the market interest rates as well as the structure and balances of assets, liabilities and equity as well as off-balance sheet items, on the level of interest rate risk taken by the Bank with respect to net interest income and measurement of the portfolio of receivables/liabilities sensitive to interest rate risk.

The Bank tests changes in the structure of its receivables and liabilities by taking into account the option risk (an increased level of early repayments of fixed-rate loans, together with a decrease in withdrawal of deposits, or an increased level of withdrawals of deposits, together with a decrease in loan overpayments – depending on the exposure direction) and potential changes in the Bank's income and changes in the economic value of the portfolio assuming "shock" changes in interest rates, for the changed portfolio structure. As regards assumptions concerning changes in interest rates, the Bank uses the following variants:

- parallel shifts in the yield curve;
- different nature of changes in the shape of the yield curve (non-parallel shift).

In addition, the Bank carries out monthly supervisory stress tests as set out in the EBA/GL/2022/14 guidelines, involving six specific EBA supervisory scenarios with yield curve changes of a different nature for the EVE measure and two supervisory scenarios for the NII measure. The supervisory thresholds set out in the guidelines were not exceeded in 2025.

The table below presents a breakdown of the Group's assets, liabilities and off-balance sheet items classified as at December 31, 2025 and December 31, 2024 according to the interest rate risk criterion. The carrying amounts of fixed-rate financial instruments are broken down by the group of held-to-maturity instruments. The carrying amounts of floating-rate financial instruments are broken down by the group of instruments according to contractual interest rate repricing dates.

5. Derivatives risk

The basic types of risk associated with derivatives are market risk and credit risk.

At initial recognition, derivative financial instruments usually are of zero or very low market value. This is due to the fact that for derivatives an initial net investment is not required at all or it is required at a low level in comparison with other types of contracts with similar reactions to changes in market conditions.

Derivatives take a positive or negative value along with changes in a particular interest rate, security price, commodity price, foreign exchange rate, price index, credit classification, credit index or another market parameter. As a result of such changes, derivatives held become more or less profitable in comparison with instruments with the same residual maturity, which are available on the market at a given point in time.

Credit risk associated with derivative contracts is a potential cost of concluding a new contract on the original terms if the other party to the original contract does not fulfil its obligation. In order to estimate the potential replacement cost, the Bank uses the same methods as for the assessment of the market risk taken.

In controlling the level of the credit risk taken, the Bank assesses other parties to contracts, using the same methods as those applied when making credit decisions.

The Bank enters into transactions in derivatives with domestic and foreign banks. Such transactions are concluded within the credit limits granted to particular institutions.

On the basis of the adopted procedure for assessing the financial standing of banks, the Bank sets maximum exposure limits for banks. Percentage exposure limits for particular types of transactions are determined within these limits.

6. Hedge accounting

The Group has adopted an accounting policy with respect to cash flow hedges for interest rate risk in accordance with IAS 39, as endorsed by the European Commission Regulation. The "carve out" in IAS 39, as endorsed by the European Commission Regulation, allows the Group to designate a group of derivatives as a hedging instrument, and cancels certain restrictions resulting from the provisions of IAS 39 with respect to deposits and the adoption of a strategy hedging less than 100% of cash flows. In accordance with IAS 39, as endorsed by the European Commission Regulation, hedge ineffectiveness occurs if and only if a re-measured value of cash flows over a specified period of time is lower than the value hedged over that period of time.

In hedge accounting, hedges are classified as:

- fair value hedges against the risk of changes in the fair value of a recognized asset or liability; or
- cash flow hedges against changes in cash flows attributable to a particular type of risk associated with a recognized asset, liability or a forecast transaction; or
- hedges of net investments in foreign operations.

A hedge against the currency risk associated with a firm commitment is accounted for as a cash flow hedge.

The Group uses the following types of hedging relationships as part of its cash flow hedges:

- cash flow hedges for term deposits;
- cash flow hedges for assets.

Cash flow hedges for term deposits

The purpose of the hedges used by the Group is to mitigate the risk of volatility of cash flows from term deposits in PLN; the hedged risk is interest rate risk arising from changes in market interest rates for the PLN currency.

The hedging instrument is a fixed-to-float IRS (Interest Rate Swap) contract, where the Bank pays interest at a fixed rate and receives interest at a floating rate. The nature of the cash flows from this transaction is opposite to that of the cash flows from the hedged item, where the Bank effectively pays a floating rate to depositors.

In order to reflect the cash flows from the hedged transactions, hypothetical IRS hedged transactions are created. The floating leg of the hypothetical transaction reflects the cash flows from the term deposit portfolio. The reference rate for the floating leg is selected by analyzing the coincidence of the interest rate of a given portfolio of term deposits and the market reference rate.

The main sources of ineffectiveness identified by the Bank concerning the above-described relationship are:

- different interest rate levels for the hypothetical derivative and the hedging instrument;
- different interest payment dates for the hypothetical derivative and the hedging instrument.

The above potential sources of ineffectiveness are addressed by the Group through:

- the creation of hedging relationships at or near the date of the conclusion of the hedging instrument, which minimizes the risk of a difference in the fixed interest rate for the hedging instrument and the hypothetical derivative;
- the reduction of timing differences by selecting interest periods consistent with the hedged item repricing periods.

Cash flow hedges for assets

The purpose of the hedges used by the Group is to mitigate the risk of volatility of cash flows from treasury bonds (held or planned to be acquired by the Group) with a variable coupon; the hedged risk is the interest rate risk arising from changes in market interest rates.

The hedging instrument is a float-to fixed IRS (Interest Rate Swap) contract, where the Bank receives interest at a fixed rate and pays interest at a floating rate. The nature of the cash flows from this transaction is opposite to that of the cash flows from the hedged item, where the Bank effectively receives a floating rate.

In order to reflect the cash flows from the hedged transactions, hypothetical IRS hedged transactions are created. The floating leg of the hypothetical transaction reflects the cash flows from the bond portfolio. The reference rate for the floating leg corresponds to the reference rate on which the portfolio of bonds designated as the hedged item is based.

The main sources of ineffectiveness identified by the Group concerning the above-described relationship are:

- different levels of interest rates (fixed and floating) for the hypothetical derivative and the hedging instrument;
- different interest payment dates for the hypothetical derivative and the hedging instrument;
- different repricing dates for the floating rate for the hypothetical derivative and the hedging instrument.

The above potential sources of ineffectiveness are addressed by the Group through:

- the creation of hedging relationships at or near the date of the conclusion of the hedging instrument, which minimizes the risk of a material difference in the fixed interest rate between the hedging instrument and the hypothetical derivative;
- entering into and incorporating into the hedging relationship IRS transactions with parameters as close as possible to those of the hedged item.

The value of the effective change in the fair value of hedging instruments recognized in the revaluation reserve was PLN -241,976 thousand gross as at December 31, 2025. Cash flows from the hedged item will be realized in the period from January 1, 2025 to May 26, 2034, i.e. until the maturity of the longest IRS transaction.

The maturity of hedging IRS transactions (notional amounts) is presented below:

VELOBANK S.A. GROUP

Consolidated financial statements for the period of 12 months ended December 31, 2025
(figures in PLN '000)

	31-Dec-2025		31-Dec-2024	
	Fixed to float	Float to fixed	Fixed to float	Float to fixed
	PLN '000	PLN '000	PLN '000	PLN '000
Maturity of hedging IRS transactions:				
from 3 months to 1 year	4,500,000	4,500,000	250,000	250,000
from 1 to 5 years	4,825,000	3,526,264	5,325,000	2,500,000
over 5 years	3,750,000	5,639,705	4,615,000	-
Total hedging IRS transactions	13,075,000	13,665,969	10,190,000	2,750,000

The table below presents the fair values of the hedging instruments with respect to cash flow hedges as at December 31, 2025 and December 31, 2024. The fair value of the hedging instrument is its carrying amount.

	31-Dec-2025	31-Dec-2024
	PLN '000	PLN '000
IRS – positive valuation	275,746	103,915
IRS – negative valuation	(668,350)	(145,241)

Changes in the fair value of cash flow hedges recognized in equity have been presented below:

	01-Jan-2025 – 31-Dec-2025	01-Jan-2024 – 31-Dec-2024
	PLN '000	PLN '000
Accumulated comprehensive income at the beginning of the period (before tax)	123,913	(29,357)
Gains/(losses) on the hedging instrument	(592,668)	(12,332)
Amount reclassified from comprehensive income to profit or loss in the period, including:	226,779	165,602
interest income	226,779	165,602
Accumulated comprehensive income at the end of the period (before tax)	(241,976)	123,913
Tax effect	55,838	(23,543)
Accumulated comprehensive income at the end of the period (net of tax)	(186,138)	100,370
Ineffective portion of the hedge and amortization of cash flows recognized in profit or loss	(1,338)	1,066
Effect on comprehensive income (before tax) in the period	(365,889)	153,270
Deferred tax on cash flow hedges	79,382	(23,543)
Effect on comprehensive income (net of tax) in the period	(286,507)	129,727

The effect of the measurements of the effectiveness of the hedging relationship on profit or loss and on other comprehensive income by the type of the hedged item is presented below:

Gross amount	01-Jan-2025 – 31-Dec-2025		01-Jan-2024 – 31-Dec-2024

Line item in the statement of comprehensive income containing recognised hedge ineffectiveness	Result on financial instruments measured at fair value through profit or loss and foreign exchange result	Result on financial instruments measured at fair value through profit or loss and foreign exchange result

7. Capital management

The primary objective of the capital management strategy is for the Group to hold an appropriate level of capital against the risk it takes.

The capital adequacy ratio is a measure of capital adequacy, reflecting the ratio of own funds (after mandatory reductions) to the sum of risk-weighted assets and off-balance sheet items. The capital adequacy ratio assigns percentage weights to assets and off-balance sheet items according to, among others, the degree of credit risk, market risk, currency risk or interest rate risk.

8. Compliance risk

The Group ensures compliance through the control function and compliance risk management.

Compliance risk is a risk of bearing the consequences of failure to comply with the provisions of law (including legal acts, regulations and resolutions) together with prudential regulations, internal regulations or internally adopted market standards, rules or codes of conduct, in the Group's activities.

The compliance risk management process includes risk identification, risk assessment, risk control, monitoring the level and profile of risk after the application of compliance risk controls, as well as risk reporting.

In the process of compliance risk identification, the Group carries out ongoing analyses of the applicable laws, prudential regulations, internal regulations and standards of conduct adopted by the Group, and collects information on the existing cases of non-compliance together with the reasons for their occurrence. When assessing the risk, the Group determines the nature and potential scale of financial losses or legal sanctions and the probability of their occurrence. Compliance risk monitoring involves the systematic observation and tracking of changes in the compliance risk level, as well as the effectiveness of the compliance risk mitigation measures applied. The process of compliance risk control and mitigation in the Group includes measures aimed to prevent the occurrence of non-compliance and breaches, eliminate identified instances of non-compliance and minimize the impact of their occurrence, and covers the following aspects: prevention (i.e. risk mitigation through the implementation of solutions and elements ensuring compliance) and mitigation (i.e. risk management following identification of non-compliance in order to mitigate any potential adverse effects of the risk). Compliance risk reporting includes the results of identification, including any identified issues, the assessment of compliance risk and the results of monitoring and control, along with the results of the tests of key controls aimed at ensuring compliance. The reports are submitted in particular to the President of the Management Board, the Management Board of the Bank, the Audit Committee of the Supervisory Board and the Supervisory Board of the Group.

In the process of compliance risk management, the Group considers the risk arising from the activities of the Group companies.

9. Risk of adverse impact on the natural environment

Environmental risk is associated with the Group's potential adverse impact on the natural environment and climate through both direct and indirect activities. The Bank's direct impact on the natural environment is limited to the consumption of natural resources. On the other hand, indirect impact on the environment concerns the financing provided by the Bank and its product offering.

The Group prevents environmental risks by complying with legal regulations, monitoring its own impact on the environment, implementing pro-environmental activities and adhering to the "ESG Policy", the "ESG Strategy" as well as the "Environmental and Social Management System (ESMS)" procedure.

The Group considers environmental and social risks in the client assessment processes, lending and project finance, taking into account not only risks associated with the sectors in which clients carry on their business, but also their functioning in the context of environmental, social and governance issues.

Issues related to the Bank's impact on the environment and the initiatives taken by the Bank are described in the Management Board's Report on the Activities of the VeloBank S.A. Group for 2025, in the "Sustainability Reporting" section.
