## Poland Economics View

### Post-election macro landscape

#### OUR TAKE

*In this note we present our updated macroeconomic scenario, reflecting implications of the recent presidential election and a change in central bank's communication. The new macro landscape appears consistent with a scenario of relatively higher rates and bond yields as compared to earlier expectations, mainly due to additional risk premium and increased borrowing needs. Implications for PLN are less straightforward as we believe the rising rates differential should offset the impact of the political risk premium.*

---

The President's role in shaping economic policies is very limited in the Polish legal system and it is mostly constrained to the ability to veto bills prepared by the government. Nevertheless, we argue that the election outcome (victory of the opposition-backed candidate Karol Nawrocki), can have meaningful impact on the macroeconomic trajectory. First, president-elect openly declared his opposition to any tax hikes, which limits chances of fiscal tightening. Second, after the lost election the ruling coalition may be inclined to conduct even more accommodative fiscal policy.

Taking this into account in our new scenario we assume no new fiscal tightening effort beyond what has already been approved (small increase in excise duties combined with the 'tax bracket creep'). These measures in total can reach 0.3-0.4% of GDP annually vs. previous plans of fiscal adjustment of 1% of GDP annually.

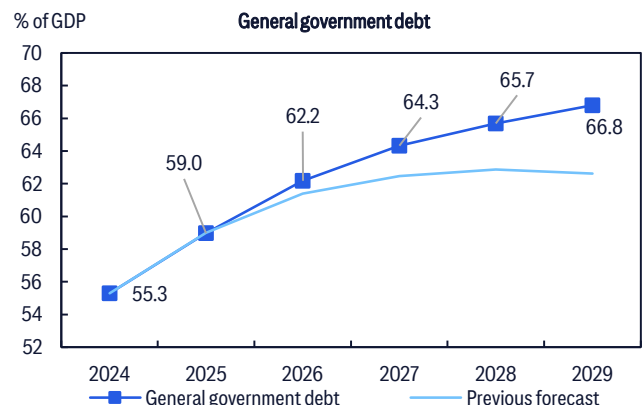

In our updated scenario the deficit falls only slightly below 6% in 2026 and stays above 5% in 2027 (Figure 1). Such a deficit path would be significantly above both the official plan of the government and the European Commission's recommended path. Although running a high deficit potentially creates a risk of EU sanctions, we believe this will not affect Poland this time. The government has already requested activation of the National Escape Clause (NEC) related to defense spending, and according to our estimates the new deficit trajectory would be within limits permitted by that Clause, at least in first two years. This means that the European Commission will likely allow Poland to run elevated deficit in the coming years without any penalties, though this will not change macroeconomic consequences of the deficit.

**Figure 1. Fiscal deficit is expected to stay significantly above 4% in the foreseeable future...**

In particular, with new fiscal deficit trajectory the general government debt is set to approach 67% within next four years vs. 55% of GDP in 2024 (Figure 2). The debt calculated according to domestic definition will stay below the constitutional limit of 60% of GDP, as that measure excludes debt issued by extra-budget funds. The rise in debt will lead also to a significant jump in debt service costs – assuming that average implicit interest on issued debt will stay around 4.7%, debt service costs will exceed 3% of GDP, up from 2.2% in 2024. With simultaneously high defense spending (~5% of GDP in cash terms) this will make policy decisions particularly challenging, making the deficit reduction even more difficult, especially in light of 2027 parliamentary elections.

We do not see any reason for significant changes to 2025 GDP growth forecast, but we think next year the growth can be stronger than previously

assumed. We estimate that the smaller scale of fiscal tightening in 2026 can add around 0.3pp to our previous growth forecasts. Taking into account also some backtracking of US administration on tariffs, we now see 2026 GDP growth at around 3.7% vs. previously expected 3.2%. Admittedly higher GDP growth should help with deficit reduction and contribute to higher denominator in the debt-to-GDP ratio but these cyclical factors are already included in our fiscal trajectories. Higher growth may add to demand side inflationary pressures but given the overall weakening of the CPI and core inflation momentum, we believe inflation will converge to the target in the coming months anyway.

In recent weeks we repeatedly highlighted that one of consequences of presidential elections could be more cautious monetary policy. NBP's pivot in June is a sign that these concerns were justified and that the fiscal outlook will likely be an obstacle for significant policy easing in Poland. Although the favourable near-term inflation outlook leaves space for rate cuts, the Monetary Policy Council appears more willing to focus on medium term risks. In practice it means rate cuts may be delivered at a slower pace and the terminal rate will likely be higher than previously assumed. In recent days the rates market started to price in such a scenario, but the terminal rate of 3.75% currently implied by the FRA curve appears low to us. Our own forecast assumes that the rate cutting cycle may end with the policy rate at around 4.25%. The timing of particular moves appears highly uncertain. Given hawkish rhetoric of NBP officials we now think the next cut may come only after the summer (in September and November) as the Council may want to see some details of 2026 budget before cutting again.

From market's point of view the recent political developments in Poland are consistent with relatively higher rates outlook, due to hawkishness of the central bank and due to larger bond issuances. However, the impact of political factors on the FX market is likely to be more neutral. Although the uncertainty adds to the risk premium, this should be largely offset by the wider interest rate differential. Also, in our view regardless of the political uncertainty Poland is likely to benefit from continued inflow of EU funds, as we do not expect the European Commission to block EU funds even if the government cannot deliver the judiciary reform.

## Citi Handlowy

Senatorska 16, 00-923 Warszawa, Polska

This material was prepared by the employees of Bank Handlowy w Warszawie S.A. Any data, information, comments, hypotheses have been developed for information purposes only and constitute neither an offer nor enticement to execute any transactions with the Bank.

This document has been issued for information purposes only and is not an offer in the meaning of Article 66 of the Civil Code. The terms and conditions presented in this document constitute a basis for negotiations only and may be amended. Binding terms and conditions shall be presented in the final draft agreement concerning a transaction and/or in a confirmation of transaction. They do not constitute any investment or financial analysis either, or any other recommendation of a general nature concerning transactions in financial instruments referred to in Article 69 clause 4 sub-clause 6 of the Act on Trading in Financial Instruments of 29 July 2005, or any 'information recommending or suggesting an investment strategy', or any 'investment recommendation' in the meaning of Regulation (EU) No. 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse. This material is not an investment research or a marketing communication within the meaning of article 36 of the Commission Delegated Regulation (EU) 2017/565 of 25 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council as regards organizational requirements and operating conditions for investment firms and defined terms for the purposes of that Directive.

All presented information is based on sources commonly regarded as reliable. The Bank made its best efforts to prepare the presented information adequately, completely and duly, however the Bank does not guarantee the adequacy or completeness of the material, especially in case any information this document is based on is considered incomplete. Any terms and conditions presented in this document are only for discussion and may change. All hypotheses contained in this document constitute an assessment for the date of publication and may be subject to change without notice.

It is exclusively Client responsibility to make the final decision whether or not to enter into a transaction and for the final result of investment decision taken based on information contained in this material.

The information contained in this publication which refers to past listings or performance of investments in a given instrument, financial index or indicator does not constitute a guarantee that the listings or performance of investments in the same instrument, index or indicator will follow the same or even a comparable trend in the future.

All the hypotheses presented are based on certain hypothetical assumptions, in particular in relation to future events or market conditions. As such assumptions adopted may fail to materialize, actual quotations and results associated with investments in the financial instruments, indices or ratios presented, may divert considerably from the values presented.

The Bank or any other subsidiary of Citigroup Inc. may occur to be an issuer or creator for identical or similar to those described in this document financial instruments. The Bank (or any other subsidiary of Citigroup Inc., or its directors, officers or employees) may be involved or may make an investment in buying or selling the financial instruments described in this document. The Bank may conclude transactions which are opposite to transactions concluded by the Client and which may or may not affect negatively the market price of a financial instrument, interest rate, index, foreign exchange rate or any other underlying market parameter (hedging). The Bank has developed policies and measures for conflict of interest management.

The Bank does not act as an advisor or a broker in financial instruments described in this market comments. The Bank certifies that the information contained in the presented document accurately reflect his own hypotheses and that it has not received any remuneration from issuers or creators of instruments, either directly or indirectly.

The Bank has not developed this market commentary based on the individual situation of the customer and not evaluated its adequacy for a Client with regard to any financial instrument described in this market comments, even if the Bank was in a possession of information as to the adequacy of certain financial instruments, investment strategy, etc. The Bank reserves the right to discontinue the distribution of market comments to selected or all customers.

Copying and distributing this document, in part or in whole, is only authorized upon the prior written consent of the Bank, except where the disclosure of this document is mandatory in legal or administrative proceedings.

Bank Handlowy w Warszawie S.A. is supervised by the Polish Financial Supervision Authority (KNF).
